

The Nature Project

Implementing Project-Based Learning in Out-of-School Time

Getting started with project-based learning is often a daunting task. Yet, the research shows that it is an extremely effective tool in developing many critical skills. Join us as we explore the world of project-based learning through the use of nature and place-based learning. We will explore your local habitats and discover ways to incorporate project-based learning, nature education and (most importantly) fun into your afterschool and summer programs. Resources will be provided as well as planning time to help you start implementing a project in your program.

There is no cost to attend these workshops. Lunch will be provided.

Who should attend?

These workshops are open to anyone interested in learning more about planning and implementing student-centered learning opportunities in out-of-school time. Workshops are designed for teams including program leaders, staff, teachers, and other providers of informal education opportunities.

Workshop presented by Lindsay Rogers, Nebraska Game and Parks Commission.

Save the Dates!

9:00 AM—3:30 PM local time

~~July 7, 2015~~ — ~~Chadron State Park, Chadron~~

July 8, 2015 — Wildcat Hills State Recreation Area & Nature Center, Scottsbluff
