<b>Science</b>	128	999	Meets the Standards	999

This report provides a record of student's test results on the NeSA in reading, mathematics and science.

**Scale Score**  
A student's scale score is a transformed version of the raw score. It provides comparable meaning across grades and across years, but only within the same subject area. Scores should not be compared across content standards or years because the items vary in difficulty level. No score means the student did not test.

**Performance Levels**  
The NeSA is designed to measure knowledge against state standards. Scores on these tests are grouped into three performance levels. The performance level chart (found below) shows the scale score ranges associated with each level.

**Percentile Rank**  
A student's percentile rank is the percentage of the peer group (e.g., grade) that the student surpassed.

**Performance on Content Standards**  
Reading, mathematics and science are composed of different content standards. The chart on the right shows how the student did on these content standards.

**Interpretation of Chart**  
The chart displays where the performance cut score lies within the possible scale score range (0-200). Scale scores are represented by the diamond (◆). For example, student's scale score in reading is 126. Note that the diamond representing this score falls in the Meets the Standards scale score range. If students with this scale score were retested, they would usually be expected to fall between 118 and 130.

Performance Level	Scale Score Ranges	Reading State Percent	Mathematics State Percent	Science State Percent
<b>Exceeds the Standards</b>	135–200	999	999	999
<b>Meets the Standards</b>	085–134	999	999	999
<b>Below the Standards</b>	084 and below	999	999	999
