

July 21–25, 2014

The Nebraska Food Project: Origins | Options | Impacts is an educational and professional development experience for all Family and Consumer Science (FCS) teachers at the middle and high school levels, Science & Agriculture Science teachers at the high school level, and School and Career Counselors at all levels. **The Nebraska Food Project** is about agricultural food production for human consumption and its origins, options and impacts. The week has been designed to increase educator awareness of the Nebraska food industry, to explore and discover career opportunities in food production and to link education to economic prosperity.

WHO:

Family and Consumer Science Middle and High School Teachers
Agricultural Science High School Teachers
School and Career Counselors

WHAT:

Summer professional development opportunity with three (3) graduate credit hours offered (paid for by the participant).
