

Targeted Teaching Topic

Author: LeeAnn Runyon

School: Bloomfield

Summary of Topic:

Viral Transmission

Main Curriculum Tie:

Health science and medical technology. Originally created by Jennifer Brown CTE Online.
<http://cteteach.cteonline.org>

Required Materials for Lesson:

Mock CDC public health issuance regarding a viral outbreak at school.

Background for Teacher:

Student Prior Knowledge:

Life science coursework about viruses.

Intended Learning Outcome:

After students share their ideas about what they know about viruses, misconceptions can be addressed during instruction.

Instructional Procedure:

- Students read the notice and highlight what they feel is the most important information.
- Have students look at highlighted pages in the text and list 5 things they know about viruses.

How to Measure Outcome:

Discussion.
