

## Map Form Documentation

---

**Purpose**            The Map Form maps question numbers on your YRBS questionnaire to the question numbers on the standard YRBS questionnaire. Your data file uses standard question numbers NOT the question numbers on your questionnaire.

**Contents** The Map Form contains the following columns:

Column	Content
Standard	Standard question number
Site	Number of the same question on your questionnaire

The first page of the map form contains all the standard questions from Q1 through Q86. The second page of the map forms contains all the site added questions beginning with Q87.

---

**How to Use the Map Form**

Because your data file uses the standard question numbers, the Map Form is necessary for conducting secondary analyses of your data. If you do not use the standard question numbers your analyses will be incorrect. It is recommended that you take a copy of your questionnaire and write in the standard question numbers for every question before beginning data analyses.
