

UPDATE

CAREER EDUCATION STANDARDS WEBSITE

<http://cestandards.education.ne.gov>

Over the past three years, Nebraska career education standards have been revised to better prepare students for their careers and to help students better meet the needs of employers. The Nebraska Department of Education and Partnerships for Innovation in cooperation with business and industry as well as Nebraska postsecondary institutions revised the course standards for Career Technical Education (CTE) courses offered in the state's public schools.

The CTE course standards were also aligned with the Nebraska's academic standards (reading, writing, mathematics and science) and the Nebraska Career Readiness Standards. The new career education course standards are available at <http://cestandards.education.ne.gov>.

A recent update to the **Career Education Standards website** reflects the sequence of career and technical education courses that form the 2014-15 Programs of Study. Programs of Study for previous years have been archived by school year.

The model standards will help school districts organize curriculum into sequences for courses in each of the following career fields:

- Agriculture, Food and Natural Resources
- Business, Marketing and Management
- Communication and Information Systems
- Health Sciences
- Human Sciences and Education
- Skilled and Technical Sciences

The revised standards also were aligned to courses offered in the state's two- and four-year colleges to create a more seamless education experience for students. Students begin with high school introductory courses that teach broad concepts and skills, progressing to college courses that offer more specific information and develop higher skill levels. Some Nebraska students will have an opportunity to earn college credits while in high school.

Career education courses provide an opportunity for students to gain the knowledge and skills they need for employment and entrepreneurship. The standards define what students should know and be able to do to enter college or their chosen career.
