

about
re**VISION**

The reVISION process provides Nebraska schools with the opportunity to analyze and transform their current career education systems in order to improve their ability to educate a qualified workforce that meets industry needs. Working in collaboration with postsecondary education and regional workforce/economic development leaders, the reVISION process links career education, school administrators, school counselors, and industry professionals. The reVISION process is a strategic approach for schools to analyze their current career education system and make plans, as needed, for adjustments.

Outcomes of reVISION

1. Identify local and/or regional workforce and economic development priorities.

This includes:

- a. Reviewing local, regional, and statewide workforce and economic data
- b. Engaging local and regional business representatives in career education programs
- c. Creating opportunities for teachers and students to experience work in career areas

2. Analyze and update current CTE Programs of Study and course offerings.

This includes:

- a. Evaluating current CTE Programs of Study and course offerings based on workforce and economic needs, State Model Programs of Study for Nebraska CTE, extended learning opportunities, and career guidance opportunities
- b. Aligning with postsecondary institutions
- c. Creating an action plan to modify current programs of study and course offerings, as needed, based on reVISION
- d. Investigating the opportunities to enhance CTE Programs of Study through the implementation of career academies

3. Evaluate career readiness.

This includes:

- a. Identifying the availability and use of K-12 career guidance systems
- b. Identifying the use of career information systems, career interest inventories/assessments, the on-going use of Personal Learning Plans, and the strategies used to provide effective career guidance based on the right education based on career choice
- c. Infusing the Nebraska Career Readiness Standards
- d. Recognizing opportunities for Work-Based Learning
