**Purpose:**

The purpose of the conference is to support school and district improvement efforts focused on the tenets of AQuESTT (i.e., College and Career Ready; Educator Effectiveness; Assessment; Positive Partnerships, Relationships & Student Success; Transitions; and Educational Opportunities and Access). The conference is also designed to broaden educator understanding of the roles of research and evaluation, emerging and best practices, and professional learning in achieving student success. In addition to sessions that focus on these topics, there will also be opportunities to learn about the latest efforts in data use, tools, and training around systems of support for Nebraska schools. Finally, we are pleased to announce the National Privacy Technical Assistance Center (PTAC) will be joining us in Nebraska to provide a series of timely and appropriate sessions on student data privacy and security best practices.

**Who should attend?**

School districts and Educational Service Units are encouraged to send teams to the conference to maximize opportunities for professional learning that will benefit their students and schools. Suggestions for team members include school and district administrators, curriculum directors, special education directors, assessment coordinators, school improvement team members, data stewards, teacher leaders, and others involved in supporting systems of education for every student, every day.
