40. At present, the Nebraska Department of Education defines technology literacy as the ability to responsibly use appropriate technology to communicate, solve problems, and access, manage, integrate, evaluate, and create information to improve learning in all subject areas and to acquire lifelong knowledge and skills in the 21st century. With the proposed reauthorization of No Child Left Behind, in the future your school district will probably be asked to report to the state the number of 8th grade students deemed technology literate. The Nebraska Department of Education will not create a state-wide test but ask schools to assess locally. Based on your best guess, would the majority of your 8th grade students meet the technology literacy definition?
