phonics/phonemic awareness needs. As a result of the process, the elementary staff chose a reading program that has specific teacher training and yearlong support from an outside evaluator. Our elementary school has started a new reading program that uses ability-grouped reading groups. The program requires teachers meeting the needs of students at their individual instructional levels. The program is designed to have smaller-sized reading groups which will attend to specific learning needs of students, thus enabling the staff to address all students. The Junior High and High School staff also evaluated student data and literature/reading/English programs. As a result, vocabulary, fluency, comprehension, and writing skills are noted as things that the district saw as needing improvement. The secondary reading/English programs started new reading, English, and writing programs. The importances of collecting data and supporting student learning outcomes have become highly important to our school. Teaching and facilitating student achievement and growth, and assisting students to be ready for college and vocational positions has become an outcome focus as we work to accomplish our school improvement goal.

A portion of this fund will create a .5 FTE teacher position. The teacher will be a reading teacher, working with below grade-level students.

*2. In order to comply with Section 427 of GEPA (20 U.S.C. 1228a), provide a description of the steps the district proposes to take to permit students, teachers, and other program beneficiaries to overcome barriers (including barriers based on gender, race, color, national origin, disability, and age) that impede access to, or participation in, particular programs to be funded with State Fiscal Stabilization Funds.

Character Count: (2051 of 2500 maximum characters used)

The steps that the district will take are to implement a scientific-researched based elementary reading program and secondary reading/English/ writing programs. These programs have data and research that supports instruction and student learning for the various circumstances that may impact student success. These new reading and writing programs are designed to meet the individual needs of each student; therefore all students will be eligible for instruction and improving their reading comprehension. Steps that are included involve individual testing of each student to determine their appropriate reading level; then students are grouped according to similar ability-students. The district will be using a new online computer-based testing program that will evaluate student progress three to four times a year (kindergarten through 2nd grade can evaluate skills anytime--- countless), thus providing a baseline data, progress monitoring data, an additional progress monitoring data checkpoint, and an outcome data evaluation. Teachers attend program specific training and are also supported throughout the year with ongoing training, instruction evaluation, program evaluation, and instructional improvement strategies. Teachers evaluate student performance and mastery level check points on students' performance levels for the elementary reading program on a near-weekly basis. Data is also evaluated often for program validity, by the building administrator and an outside program evaluator. Appropriate materials are used by trained teachers to teach reading skills to each student. Students are evaluated often for mastery level knowledge and skills. Students are often re-evaluated for appropriate reading levels and are re-grouped to meet their individual reading needs. Materials are evaluated for appropriate issues of gender, race, color, national origin, disability, and age according to the reading materials evaluation guide and rubric. Teachers are required to teach multi-cultural lessons, which encourage overcoming barriers.

IDEA Part B - (Section 611 - E/P) - Instructional Staff

Full Time Equivalency (FTE) is the indication of the time an individual spends in their position assignment as it relates to the total time in the work week defined for that position by each school/system during the regular school year. The number of hours in a work week may vary between school districts/systems, schools in a district/system and within a school (i.e., the number of hours in the work week for school administrative staff may differ from the number of hours in the work week for teaching staff). In all cases, full-time is equal to 1.00. No individual should be reported as more than 1.00 FTE regardless of how many positions that individual serves in a district/system.

This page is for the identification of Instructional Staff paid with Special Education, Part B (611) E/P funds.

I Certify that, to the best of my knowledge and belief, this report is true and correct in all aspects; supporting documentation for all entries in the accounting records are on file and will be retained for five (5) years or until the Applicant is notified that such records are no longer needed for administrative review; and the federal funds have been expended only for the purposes they were granted.

Consolidated requests

You can submit consolidated requests for more than one program.

When submitting a consolidated request, any program that is on hold for any reason, will automatically hold all other programs in the request. That means, that if you have combined all programs in one request, if there is a question on Title IID, you will not be paid for any of the other programs until the issue is resolved.

No excess CASH ON
HAND!!!

Final Closeouts

You can create a Final at ANY time!

You are encouraged to create and submit a final closeout once the district has fully expended funds. This will speed up end of the year processing for Financial Services and will ensure quicker turn times so you get your funds faster.
