

## Targeted Teaching Topic

**Author:** D. Howard  
**School:** Creek Valley Schools

### Summary of Topic:

Students will sketch the major organ systems of an “alien” from space.

### Main Curriculum Tie:

Structure and function.

### Required Materials for Lesson:

- Poster board.
- Markers.

### Background for Teacher:

Avoid reproductive system; it ends up being too graphic.

### Student Prior Knowledge:

General knowledge of organ systems.

### Intended Learning Outcome:

Show a basic understanding of organ systems.

### Instructional Procedure:

- Students will sketch a fiction “alien” on a poster board using markers. Work in pairs.
- Sketch in major organs and label.
- Present “alien” to class and discuss the organs for each organ system.

### How to Measure Outcome:

All major organ systems found in humans should be presented.
