Strategies for Diverse Learners

This section is in four parts. The first part, Planning Instruction, provides general descriptions of types of diverse learners and the challenges they may present in the classroom. The second part, General Strategies, looks at learning theories and instructional strategies that can be used effectively when designing instruction for diverse learners. Part three, Strategies in the Foreign Language Classroom, translates some of the general strategies into specific examples for the foreign language classroom. The sample units provide examples of learning scenarios that have been adapted for use with diverse learners. Finally, the glossary, references, and appendixes define some of the key terms used in this section and provide additional resources for planning and implementation.

Marie Trayer, Foreign Language Frameworks Project, Nebraska Department of Education
John LeFeber, Social Studies Education, Nebraska Department of Education; Coordinator–Social Studies Framework
Introduction

The materials in this section were compiled and written by a team of Nebraska teachers endorsed in foreign language, special education, and high-ability learning who collaborated to develop suggestions for teachers to better meet diverse academic needs in a regular classroom setting.

In the spirit of the Nebraska K-12 Foreign Language Frameworks, these suggestions were developed by teachers for teachers. They are a logical extension of the Frameworks in that the strategies, activities, and resources expand the number of tools that the classroom teacher can use to enhance foreign language instruction for a wider student audience.

The team approached its work in the belief that, with the necessary supports and accommodations in place, nearly all students can benefit from the strategies and suggestions included in this section. The team did not operate from the belief that all students must be in the regular classroom all of the time. Individual needs demand a wide array of program options and services be available.

With these teaching strategies, learning scenarios, reference and resource materials, and staff development resources described on the following pages, the team hopes to:

- encourage increased partnerships with specialists, regular classroom teachers, and staff developers toward better meeting academic diversity in the regular classroom setting.
- increase awareness of specialized students learning needs.
- expand classroom teachers’ abilities to meet student needs in a time of increasingly limited resources.
- encourage teachers to consider further training in specific strategies and techniques to meet the diverse learning needs of their students.

Meeting Diverse Learning Needs in the Classroom

Most diverse learning needs can be met in the general classroom when classroom teachers understand that:
1) student performance is the result of interaction between the student and the instructional environment; and 2) teachers can reasonably accommodate the needs of most students after analyzing individual learning styles and the demands of the instructional environment.

Accommodating the learning needs of a specific student is often beneficial to many other students in the same classroom. These adaptations are also good teaching techniques for adding variety and interest to any classroom.

Ultimately, the individual classroom teacher is the most effective variable for influencing the performance of students.
Making adaptations or accommodations to meet specific learning needs does not imply that classroom goals or expectations are compromised. The strategies suggested in this section honor the goals and learner results intended by the *Nebraska K-12 Foreign Language Frameworks*. They are intended to be idea generators for the classroom teacher.

### Teaming and Partnerships

Many of the suggestions encourage dialogue and teaming with special education teachers and gifted coordinators to be most effective. Often, the best results can be achieved when classroom teachers partner with building specialists in areas such as special education, gifted and talented, and English as a Second Language (ESL). Further training in many of the strategies would be beneficial to teams of teachers within a building or teaching unit.

Ultimately, the individual classroom teacher is the most effective variable for influencing the performance of students. The *Nebraska K-12 Foreign Language Frameworks*, teaching strategies, learning scenarios, and resource lists exist only as tools to help teachers help their students develop skills for life-long learning and understanding.

### Planning for Diverse Learning Needs in the Classroom

Teachers who want to meet the diverse learning needs of their students must analyze the instructional demands of their curriculum, identify the learning abilities and needs of their students, and make adaptations to meet the diverse learning abilities and needs in their classrooms. An *adaptation*, as defined here, does not change the intended outcome of the lesson. For some students, however, a *modification*—which changes the intended outcome—may be appropriate. Teachers are encouraged to work with special education teachers and gifted coordinators to design modifications in lessons to meet the needs of these students.

A decision-making process called INCLUDE was developed by Marilyn Friend of Indiana University. This seven-step approach helps teachers plan how to accommodate the diverse learning needs in their classroom:

1. **Identify** classroom environmental, curricular, and instructional demands.
2. **Note** student strengths and needs.
3. **Check** for potential areas of student success.
4. **Look** for potential problem areas.
5. **Use** information gathered to brainstorm instructional adaptations.
6. **Decide** which adaptations to implement.
7. **Evaluate** student progress.
Each student brings different abilities and learning needs to the classroom. Identification of these is necessary before appropriate instructional strategies can be designed that will lead to success in learning for each student. The information in this section is directed toward the following groups:

- Students with diverse talents (multiple intelligences)
- Students with high abilities (gifted)
- Students with specific learning needs and/or difficulties (special education)

Each classroom will also have students from different ethnic, cultural, linguistic and socio-economic backgrounds. These diversity factors are not addressed in this document, but recognizing and acknowledging these differences is important to any effective learning environment.

One way to describe students is to discern the variety of talents and abilities that each brings to the learning experience. Each student has a unique combination of strengths and weaknesses. Howard Gardner (1983) grouped these capabilities into seven comprehensive categories or intelligences. Recently, an eighth intelligence has been added. Thomas Armstrong (1994) described the intelligences as they pertain to students in the classroom:

**Linguistic intelligence**—students are word smart and have the capacity to use words effectively, orally or in writing. It includes the ability to manipulate the structures, sounds, and meaning of language.

**Logical-Mathematical Intelligence**—students are logic smart and have the capacity to use numbers effectively and to reason well. It includes the ability to perform processes such as categorization, classification, inference, generalization, calculation, and hypothesis testing.

**Spatial Intelligence**—students are picture smart and have the ability to perceive the visual-spatial world accurately and to perform transformation upon those perceptions. It includes the capacity to visualize and to graphically represent visual or spatial ideas.

**Bodily-Kinesthetic Intelligence**—students are body smart and have expertise in using their whole body to express ideas and feelings, and facility in using their hands to produce or transform things.

**Musical Intelligence**—students are music smart and have the ability to perceive, discriminate, transform, and express musical forms. It includes sensitivity to rhythm, pitch or melody, and tone color of a musical piece. A student’s understanding may be either figural/intuitive or formal/technical.
Strategies for Diverse Learners

Interpersonal Intelligence—students are people smart and can perceive and make distinctions in the moods, intentions, motivations, and feelings of other people. This can include the ability to respond to cues such as facial expressions, voice, and gestures.

Intrapersonal Intelligence—students are self smart and have the ability to act adaptively on the basis of their self-knowledge. This includes awareness of inner moods, intentions, motivations, temperaments, and desires; and also the capacity for self-discipline, self-understanding, and self-esteem.

Naturalist-Physical World Intelligence—students are nature smart and sensitive to the intricacies and subtleties of the connectedness in nature. They are able to listen, watch, observe, classify, categorize, discern patterns, and appreciate nature through a variety of activities in the outdoors (Fogarty, 1997).

Areas of challenge in the classroom

There are four key points (Armstrong, 1994) to remember when designing instructional strategies for multiple intelligences:

1. Everyone has some abilities in each of the seven intelligences. Some students will function at high levels in all or most of the seven intelligences; others may appear to struggle in all areas. Most students will fall somewhere in between, with strengths in some areas and weaknesses in others.

2. Most students can develop each intelligence to an adequate level of competency. With appropriate encouragement, enrichment, and instruction, virtually everyone is capable of performing at a reasonably high level in each of the intelligences (Gardner, as cited).

3. Intelligences work together in complex ways. Gardner proposed that no intelligence exists solely by itself. They are defined individually for theoretical study; but in real-life contexts, the intelligences are interwoven with each other.

4. There are many ways to be intelligent within each category. A student may perform well in one aspect of an intelligence while struggling in another area of the same intelligence. For example, a student may have difficulty reading and yet be highly linguistic orally with a well-developed vocabulary.

Using a variety of instructional techniques and strategies will accommodate the diverse talents within a classroom and will ensure that each student will be able to experience success in some areas and challenge growth in others. (See Learning Theories and Instructional Models, page 263, and Strategies in the Foreign Language Classroom, page 301.)
Students with high abilities are those who give evidence of high performance capability in such areas as intellectual, creative, or artistic capacity or in specific academic fields. Gifted students are those who excel markedly in the ability to think, reason, judge, invent, or create. (See Appendix A, page 337, for a full description.) Barbara Clark (1983) identified several characteristics gifted students exhibit and their potential challenges in the traditional classroom. These are shown in Figure A.

**Figure A: Characteristics and classroom challenges of students with high abilities** (adapted from Clark, 1983)

<table>
<thead>
<tr>
<th>Characteristics</th>
<th>Potential Classroom Challenges</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ability to handle extraordinary quantities of information with unusual retentiveness</td>
<td>Student may express boredom with the regular curriculum and be impatient waiting for other students.</td>
</tr>
<tr>
<td>Ability to comprehend information beyond the abilities of their peers</td>
<td>Student may dislike repetition; possibly may have poor interpersonal relationships with other students.</td>
</tr>
<tr>
<td>Unusual curiosity and varied interests</td>
<td>Student may have difficulty conforming to group tasks; may take on too many projects at once and overextend.</td>
</tr>
<tr>
<td>High level of language development</td>
<td>Student may be seen as a “show off” by peers and adults.</td>
</tr>
<tr>
<td>High level of verbal ability</td>
<td>Student may dominate classroom discussions; may use verbalism to avoid tasks and difficult thinking.</td>
</tr>
<tr>
<td>Unusual capacity for processing information</td>
<td>Student may dislike routine and drill; may resent being interrupted; may be perceived as too serious.</td>
</tr>
<tr>
<td>Accelerated pace of thought processes</td>
<td>Student may become frustrated with inactivity and the absence of progress.</td>
</tr>
<tr>
<td>Flexible thought processes</td>
<td>Student may be seen as disruptive or disrespectful to authority and traditions or to the idea of a single right answer.</td>
</tr>
<tr>
<td>Creativity, particularly an ability to synthesize, delay closure, see unusual and diverse relationships, and to produce original ideas and solutions</td>
<td>Student may have difficulty with conformity; may deal with rejection by becoming rebellious.</td>
</tr>
<tr>
<td>Ability to think in abstract terms and form concepts</td>
<td>Student may reject or omit detail, question other’s generalizations, and show frustration with other student’s lack of ability to understand concepts or generalizations.</td>
</tr>
<tr>
<td>Evaluative approach to others and themselves</td>
<td>Student may be perceived as superior and too critical; may become discouraged from self-criticism, won’t try new ideas; may be intolerant of students of lesser abilities.</td>
</tr>
<tr>
<td>Persistent goal-directed behavior</td>
<td>Student may be perceived as stubborn, willful, and uncooperative.</td>
</tr>
<tr>
<td>Large accumulation of information about emotions that has not been brought to awareness</td>
<td>Student may be vulnerable to criticism of others, have a high level of need for success and recognition, be a perfectionist.</td>
</tr>
<tr>
<td>Keen sense of humor that may be gentle or hostile</td>
<td>Student may use humor for critical attack upon others resulting in damage to interpersonal relationships.</td>
</tr>
</tbody>
</table>
High-ability learners present challenges for teachers who must design learning opportunities to help them more nearly achieve their potentials. Lessons that are adapted to meet the needs and abilities of high-ability learners may also help alleviate difficulties that some gifted students experience in their interactions with other students in the regular classroom. (See Gifted and High-Ability Learners, page 268.)

While all students have unique learning needs, some students are posed with particular challenges in the traditional learning environment. Rule 51, Nebraska Department of Education, Regulations and Standards for Special Education, identifies these as students with:

- autism
- behavioral disorders
- hearing impairments
- subaverage general intellectual functioning
- orthopedic impairments
- health impairments that limit strength, vitality, or alertness
- specific learning disabilities
- speech impairments
- traumatic brain injury that results in functional disability or psychosocial impairment
- visual impairment

(See Appendix B, page 338, for full definitions.)

Areas of challenge in the classroom

Special education students predictably may present challenges in the traditional classroom and would benefit from adaptive strategies in:

- spelling
- reading—paragraphs, directions for work, maps and charts, visually crowded layouts
- writing—sentence formation, pertinent details, sequence, physically difficult
- note taking—physical difficulty, inability to readily grasp concepts
- vocabulary—comprehension and memory
- organization—may be unprepared for class or have incomplete assignments
- following directions—reading, remembering, comprehending
- social skills with peers and adults
- listening -- inattentive, distractible

▼ Students with Specific Learning Needs
(special education)
Students who have been identified and placed in a special education category may be provided with assistive technologies or other special assistance to accommodate their needs; however, teachers can also adapt lessons to better meet their specific needs. Other students in the classroom who have difficulties in these areas will also benefit from these adaptive strategies. (See Learning Theories & Instructional Models, page 263, and Strategies in the Foreign Language Classroom, page 301.)
Introduction

There are many different ways to look at learning capabilities, learning needs, and learning styles. Each has specific implications for instructional strategies. By employing a variety of instructional strategies in the classroom, teachers will provide for the specific learning needs of individual students and enhance the learning of all students. The learning theories and general instructional strategies that are addressed in this section include:

- Multiple intelligences
- Gifted students in the classroom
- Bloom’s taxonomy
- Thematic units
- Graphic organizers

Multiple Intelligences

Howard Gardner (1983) identified seven intelligences as a way to view different cognitive strengths and contrasting cognitive styles. From this he constructed his model of multiple intelligences to describe how individuals use their intelligences to solve problems and fashion products (Armstrong, 1994). Recently, he has identified an eighth intelligence (Fogarty, 1997). The intelligences identified by Gardner are:

- linguistic intelligence
- logical-mathematical intelligence
- spatial intelligence
- bodily-kinesthetic intelligence
- musical intelligence
- interpersonal intelligence
- intrapersonal intelligence
- naturalist-physical world intelligence

In the classroom teachers can meet these diverse talents by:

- Identifying each student’s strengths (see Figure A--Checklist for Students, for a student self-test)
- Planning lessons and learning activities to accommodate the variety of intelligences in the classroom (see Figure B--Planning Model for Multiple Intelligences)
- Also see Ideas for Exhibitions and Projects, page 192 in the Nebraska K-12 Foreign Language Frameworks’ section on assessment, for an extensive list of specific learning activities that will fit into strategies for multiple intelligences.
Multiple Intelligences Checklist

This checklist has no right or wrong answers. No one intelligence category is better than others. We all have some intelligences that are stronger and some that are weaker. This checklist will give clues about how you learn best and also about strengths that may guide you in career choices. Put a check mark beside each item that sounds like you.

▶ Linguistic Intelligence
   ___ I enjoy reading books.
   ___ I like to tell jokes and stories.
   ___ I enjoy word games like Scrabble, anagrams, or crossword puzzles.
   ___ I am a good speller.
   ___ English, social studies, and history are easier for me than math and science.
   ___ I have a good memory for names, places, dates, and/or trivia.
   ___ I am a good writer.

▶ Logical-Mathematical Intelligence
   ___ I can compute math problems quickly in my head.
   ___ Math and science are among my favorite subjects in school.
   ___ I enjoy games like chess, checkers, and other strategy games.
   ___ I like working on logic puzzles or brainteasers.
   ___ I like to think about the way things work.
   ___ I can double or triple a cooking recipe or other measurement without having to put it down on paper.
   ___ I believe that most things have a logical, rational explanation.

▶ Spatial Intelligence
   ___ I can see clear visual images when I close my eyes.
   ___ I can read maps, charts, and other diagrams more easily than written directions.
   ___ I enjoy art activities.
   ___ I like to solve jigsaw puzzles, mazes, and “Where’s Waldo” type puzzles.
   ___ I tend to doodle or draw on my papers.
   ___ I like to watch movies, slides, or other visual presentations.
   ___ I enjoy building three-dimensional constructions with Legos or other supplies.

▶ Bodily-Kinesthetic Intelligence
   ___ I am good at sports.
   ___ I have a hard time sitting still for very long.
   ___ I like to take things apart and put them back together again.
   ___ I like working with my hands in activities such as model-building, sewing, pottery, weaving, carving, or carpentry.
   ___ I often like to spend my free time outdoors.
   ___ My best ideas come to me when I’m out for a walk, a jog, or some other kind of physical activity.
   ___ I frequently use hand gestures when I’m talking to someone.

... continued

Figure A: Multiple Intelligences Checklist for Students
Figure A: Multiple Intelligences Checklist, page 2

Musical Intelligence
- I frequently listen to music.
- I enjoy singing along to music I hear.
- I can usually tell when something is off-key.
- I often make tapping sounds or sing little tunes while working, studying, or learning something new.
- If I hear a musical selection once or twice, I can usually sing or play it back fairly accurately.
- I play a musical instrument.
- I can easily keep time to a piece of music.

Interpersonal Intelligence
- I'm considered a person who other people come to for advice.
- I prefer group activities to being alone.
- I like to get involved in social activities at school and in my community.
- When I've got a problem, I'm more likely to seek out another person for help than attempt to work it out on my own.
- I am concerned about others and how they feel.
- I consider myself a leader (or others have called me that).
- I feel comfortable, even with people I don't really know.

Intrapersonal Intelligence
- I consider myself to be very independent.
- I prefer to study, work, or play alone.
- I see myself as a loner (or others see me that way).
- I have a special hobby or interest that I keep pretty much to myself.
- I have some important goals for my life that I think about on a regular basis.
- I would prefer to spend a weekend alone in a cabin in the woods, rather than at a fancy resort with lots of people around.
- I can accurately express how I'm feeling.

Naturalist-Physical World Intelligence
- I prefer to spend a lot of my time outdoors.
- I am good at working and playing with animals.
- I collect things from nature and know their names.
- I study the weather and follow weather phenomenon.
- I often do experiments to find out what will happen.
- I watch birds and insects and study their habits.
- I like to hike, climb, hunt, and/or fish.

Totals: Put the number of checkmarks that you made under each intelligence in the spaces below:
Linguistic: _____ Logical-Mathematical: _____ Spatial: _____ Bodily-Kinesthetic: _____
Musical: _____ Interpersonal: _____ Intrapersonal: _____ Naturalist-Physical World: _____

Nebraska K-12 Foreign Language Frameworks
The presence of gifted and high-ability learners in a heterogeneous classroom can present unique challenges for the teacher in designing appropriate learning strategies that will engage these students in learning that helps them achieve their potentials. Some researchers argue that there must be a concentrated focus on differentiating the learning environment and curriculum to provide the motivation and achievement sought for these learners (Shore & Delacourt, 1996). Others contend that instructional practices associated with programs for gifted learners are practices that would benefit all learners. In addition, the variety of learning levels and abilities within the gifted-student population itself may require modified instructional strategies to address the various learners’ profiles (Tomlinson, 1996).

The following profile of gifted/high-ability learners and instructional strategies (Figure C), the planning model for academic diversity (Figure D), and the planning model for modification and adjustment (Figure E) will assist teachers in designing effective learning environments and activities for the gifted/high-ability learners in their classrooms. The models also provide a foundation of good instructional strategies that will benefit all learners.

Adjusting for Academic Diversity

Academic tasks may be adjusted and modified based on the level of readiness, ability, and interest of each learner. Learners who are struggling or who are new to a learning situation, concept, or idea would benefit from tasks at the lower end of the adjustment continuum. Learners who have high ability in an area and readily grasp the ideas and concepts because of prior readiness or interest, will benefit from academic tasks at the high end of the continuum. A planning model for modification and adjustment for academic diversity is shown in Figure E.

Bloom’s Taxonomy is a model that focuses on six levels of thinking. The six levels roughly form a two-tiered arrangement that represents levels of complexity in thinking. **Knowledge** and **comprehension** are the lower or more concrete levels of thinking. **Analysis**, **evaluation**, and **synthesis** represent higher or more complex levels of thinking. The **application** level, which falls between the lower and higher levels, can be very concrete or very complex depending on the task.

A variety of instructional strategies and products may be categorized for each level of thinking. Teachers who design a variety of learning activities that require different levels of thinking will provide appropriate opportunities for the diverse number of students whose thinking levels range throughout the spectrum.

Figure F provides a model for instructional planning based on Bloom’s taxonomy of thinking. Also see Bloom’s taxonomy as applied to foreign language, page 307.

---

### Bloom’s Taxonomy of Thinking

**Knowledge**
- Students recall information to recite or write.
- Instructional Strategies:
  - ask • define • describe
  - discover • identify • label • list
  - listen • locate
  - match • memorize • name
  - observe • recite • recognize
  - remember • research • select
  - state • tell
- Activities, Tasks, & Products:
  - books • diagrams
  - events • exams • facts in isolation • films • filmstrips
  - magazine articles • models
  - newspapers • people • plays
  - quiz • radio • recordings/records • tapes • television shows • tests • text readings
  - vocabulary • workbook pages

**Comprehension**
- Students restate the information in their own words.
- Instructional Strategies:
  - ask • change • compare
  - convert • defend • discover
  - distinguish • edit • explain
  - express • extend • generalize
  - give examples • identify
  - illustrate • infer • interpret
  - listen • locate • match
  - observe • paraphrase
  - predict • relate • research
  - restate • rewrite • show symbols • summarize
  - transform • translate
- Activities, Tasks, & Products:
  - casual relationships
  - comparison of like/unlike items • conclusion/implication based on data • diagrams
  - drama • drawing • events
  - films • filmstrips • graph
  - magazines • models
  - newspapers • outline
  - own statement • people
  - photgraph • radio
  - response to questions
  - revision • skit • speech
  - story • summary • tape recording • television

Thematic Learning

Thematic learning is a way to plan curriculum that meets the diverse needs and abilities of students. When properly designed, thematic units are appropriate for students at all ability levels (Winebrenner, 1996). Themes provide organizing centers for:

- Connecting various disciplines or subject matter content (see Frameworks Goal 3, page 51).
- Developing learning activities around the eight intelligences (see Multiple Intelligences, pages 257 and 263).
- Providing learning opportunities that require different levels of thinking (see Bloom’s Taxonomy of Thinking, page 272).

A theme may be used to plan a brief unit of study, a comprehensive unit spanning a greater period of time, or to connect with other disciplines in a team or block-scheduling situation. Winebrenner (1992, page 74) provides a graphic organizer that connects subject areas and student capabilities around a main theme as shown in Figure G. Fogarty (1997, page 48) shows how activities for multiple intelligences might be planned in a theme organized around the Olympic Games—or Games of Life—in Figure H.

Figure G: Thematic Unit Design (Winebrenner, 1992)

A thematic unit can be designed to include several subject areas.

### Designing a Thematic Plan

Another way to use thematic learning is to use the theme as a tool for designing activities requiring different levels of thinking that allow for differences among students in readiness, interest, and ability. Winebrenner (1992) presents an outline for planning a thematic unit and a template for planning learning activities. These have been adapted for use with the *Nebraska K-12 Foreign Language Frameworks* in Figures I and J, respectively. An example of a thematic unit in the foreign language classroom is shown on page 308.

#### Figure I: Designing a Thematic Plan
(adapted from Winebrenner, 1992)

<table>
<thead>
<tr>
<th>Steps for Designing a Thematic Plan for Students with Varying Abilities</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Step 1:</strong> Choose a theme that may be used to incorporate many expected learner outcomes. The theme should be broad enough to apply to several topics within the same theme. Examples: Conflict, Civilizations, Mammals. Write the theme on the line provided on the planning chart (<em>Figure K</em>).</td>
</tr>
<tr>
<td><strong>Step 2:</strong> Create several contexts/outcomes of what students should know and be able to do from all subject areas that students will experience during the thematic unit. (<em>See the Frameworks section on Curriculum Planning.</em>) Write these in the appropriate section on the planning chart.</td>
</tr>
<tr>
<td><strong>Step 3:</strong> Determine the essential skills and knowledge that all students will need for mastery and add them to the planning chart.</td>
</tr>
<tr>
<td><strong>Step 4:</strong> Using the chart on page 272 (<em>Bloom’s Taxonomy of Thinking</em>) as a reference, design instructional activities that will give students experience in mastering the essential skills and knowledge and achieving the desired outcomes. Working across the planner—that is, horizontally—enter the activities making sure that each activity is appropriate for achieving the specific context and outcome of what students should do and what the product should be. By working horizontally rather than vertically gives teachers the opportunity to design activities from the lower, concrete levels to the higher levels of thinking. Winebrenner (1992) suggests that teachers should design the higher-level activities so that gifted/high-ability students may not have to do the literal activities in order to achieve the outcomes. Other students will need teacher direction with the literal activities before moving on to the higher-level activities.</td>
</tr>
<tr>
<td><strong>Step 5:</strong> Add the activities to the planning chart, making sure that each activity teaches the essential skills and knowledge defined in step three and that activities requiring higher levels of thinking are included.</td>
</tr>
<tr>
<td><strong>Step 6:</strong> If the theme unit is carried out over a long period of time, a contract or work log may be created to help teachers and students manage doing different activities at different times. (<em>See Portfolio Management, page 155.</em>)</td>
</tr>
<tr>
<td><strong>Step 7:</strong> Decide the methods of assessment and provide the evaluation criteria and standards with students before they begin their work. (<em>See the Frameworks section on Assessments.</em>)</td>
</tr>
</tbody>
</table>

Graphic Organizers

Graphic organizers are valuable tools to use when working with students with diverse abilities. The organizers can facilitate learning and may be useful in bridging the wide spreads of learning levels within a classroom (Winebrenner, 1996). Bellanca (1992) and Winebrenner (1996) see graphic organizers as a way to help students
- connect new information to old;
- discover patterns in what they learn;
- control how and what they learn by employing a variety of learning tools;
- create internal motivation to think and problem-solve; and,
- become active learners.

Graphic organizers provide alternative ways to organize information and content for different types of learners (multiple intelligences). When students work together to complete an organizer, it promotes cooperative learning among a diverse group of students.

The graphic organizers on the following pages are arranged alphabetically by title and numbered. Each is designed to help develop specific thinking skills as shown in Figure K. Detailed information about teaching and using these organizers may be found in Bellanca (1992), Winebrenner (1996), and Mikulecky (1985) as cited by Hudelson (1992).

**Figure K: Thinking skills aided by graphic organizers**

| Summarizing | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |
The 5 Ws *

**Purpose:**
To ask questions that require the learner to gather and summarize information

**Thinking Skills:**
Gathering, evaluating by criteria, sequencing, summarizing

**How to Use:**

* As illustrated and described in Bellanca, 1992

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Alice</td>
<td>fell down a rabbit hole</td>
<td>she was chasing the rabbit</td>
<td>in Wonderland</td>
<td>she was very curious</td>
</tr>
</tbody>
</table>

**Summary sentence:** Because Alice was very curious, she chased a rabbit and fell down the rabbit hole in Wonderland.

Summary Sentence: ________________________________
Graphic Organizer 2

Cause and Effect Flow Chart *

Purpose:
To show how an event or condition resulted in a particular situation or effect

Thinking Skills:
Inferring, analyzing, cause/effect

How to Use:
Pose a question about a situation and answer it by analyzing the events, conditions, or causes that led to a particular result.

* as illustrated by Mikulecky (1985) as cited by Hudelson, 1995

Example:
Why did the Spanish become separatists?

```
<table>
<thead>
<tr>
<th>Cause</th>
<th>effect/cause</th>
<th>Result</th>
</tr>
</thead>
<tbody>
<tr>
<td>mountains</td>
<td>separation</td>
<td>Separatism</td>
</tr>
<tr>

Cause & Effect Flow Chart

Question: ____________________________________________________________
Cause and Effect Flow Chart with Multiple Causes *

Purpose:
To show the events or conditions that led to a particular situation or effect

Thinking Skills:
Inferring, analyzing, cause/effect

How to Use:
Pose a question about a situation and answer it by analyzing the events, conditions, or causes that led to a particular result.

* as illustrated by Mikulecky (1985) as cited by Hudelson, 1995

Template: (Resize to 8 1/2” x 11” by copying at 150%)
Comparison Chart *

**Purpose:**
To show similarities and differences between two or more topics (people, places, events, or ideas)

**Thinking Skills:**
Comparing, contrasting, analyzing

**How to Use:**
Write the topics in the top row of the grid; write the elements for comparison in the left column; write appropriate data in the remaining columns.

*As illustrated by Mikulecky (1985) as cited in Hudelson, 1995

<table>
<thead>
<tr>

</table>
Concept Ladder *

Purpose:
To arrange information about a person, item, or topic into an organized framework

Thinking skills:
Listing, categorizing, brainstorming

How to Use:
Label each “rung” of the ladder with a characteristic of the person, thing, or idea. Fill in the frames with appropriate information.

* as illustrated by Mikulecky (1985) as cited by Hudelson, 1995

Example:

<table>
<thead>
<tr>
<th>Made (used) for?</th>
<th>breakfast, snack</th>
</tr>
</thead>
<tbody>
<tr>
<td>Parts of?</td>
<td>flaky crust, bread, filling</td>
</tr>
<tr>
<td>Gear/Equipment?</td>
<td>bowl, spoon, baking sheet, oven</td>
</tr>
<tr>
<td>Types of?</td>
<td>plain, fruit, chocolate</td>
</tr>
<tr>
<td>Made of?</td>
<td>flour, butter, yeast, milk</td>
</tr>
<tr>
<td>Kind of?</td>
<td>pastry/bread</td>
</tr>
</tbody>
</table>

Template: (Resize to 8 1/2” x 11” by copying at 150%)
Decision-Maker’s Flow Chart *

**Purpose:**
To make a judgment or determination by following a detailed structure of steps

**Thinking skills:**
Alternative seeking, evaluating, brainstorming, analyzing, deciding

**How to Use:**
Reach a decision by examining:
- Need—a requirement, duty, or obligation
- Alternatives—a choice limited to one of two or more possibilities
- Consequences—positive and negative effects, results, or outcomes of something

*as illustrated and described in Bellanca, 1992*

**Example:**

**Topic:** Civil War

**NEED:** To decide on essay topic on Civil War

- People
  - + interesting characters
  - - not many women to choose from

- Causes
  - + lots of theorizing
  - - hard to pin down

- Outcomes
  - + far-reaching
  - - too much for one essay

- Battles
  - + interesting!
  - - too narrow

**Decision:** People

**Template:** (Resize to 8 1/2” x 11” by copying at 150%)

**DECISION:**
Fat & Skinny Questions

Purpose:
To practice forming factual and complex thought questions

Thinking Skills:
Inquiring, investigating, analyzing, compare/contrast

How to Use:
Create skinny (factual) questions--What is...? When did...? Can...? Will...? Is it true that...?

Use the skinny questions to lead into fat (complex) questions--Explain why.... What if...? Predict what would happen if.... Why do you believe...?

* As described and illustrated in Bellanca, 1992

Example:

<table>
<thead>
<tr>
<th>FAT?</th>
<th>Skinny?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Why do you think Lindbergh called his plane &quot;The Spirit of St. Louis?</td>
<td>Who made the first transatlantic flight?</td>
</tr>
<tr>
<td>What difficulties do you think he might have had finding a plane?</td>
<td>What was the name of his plane?</td>
</tr>
<tr>
<td>Explain why his arrival in Paris was such a big celebration.</td>
<td>What was his destination?</td>
</tr>
</tbody>
</table>

Template: (Resize to 8 1/2” x 11” by copying at 150%)

Name(s):_________________________________________ Topic:_________________________________________

Fat and Skinny Questions
The Fishbone *

Purpose:
To gather information from a reading selection and to summarize it

Thinking skills:
Gathering, evaluating by criteria, summarizing

How to Use:
Complete the fishbone by identifying the main topic of the selection and then finding and filling in the answers to who, what, when, where, why, and how. Summarize the information into a single sentence.

* As illustrated and described in Winebrenner, 1996

Example:

Name(s): ___________________________ Topic: ___________________________

The Fishbone

MAIN TOPIC: Alice in Wonderland

WHO? Alice
WHAT? fell down a rabbit hole
WHEN? she was chasing a rabbit
WHERE? in Wonderland
WHY? She was very curious
HOW?

Summary: Alice, who was very curious, chased a rabbit and fell down into Wonderland when she looked into the rabbit hole.

Template: (Resize to 8 1/2" x 11" by copying at 150%)
The Frame *

**Purpose:**
- To sequence story events
- To outline sequential events or materials
- To encourage translation of ideas from print into a different mode of expression

**Thinking Skills:**
Sequencing, perceiving time-sequenced relationships

**How to Use:**
Gather information and place it in an order by time or by concept development. Pictures may be used, as in a comic strip.

* As described and illustrated in Bellanca, 1992

**Example:**

<table>
<thead>
<tr>
<th>Title: How to make a peanut butter and jelly sandwich</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Take two pieces of bread, some jelly, and some peanut butter.</td>
</tr>
<tr>
<td>2. Use a knife</td>
</tr>
<tr>
<td>3. Put the two pieces of bread together.</td>
</tr>
<tr>
<td>4. Serve with milk.</td>
</tr>
<tr>
<td>5. Eat the sandwich.</td>
</tr>
</tbody>
</table>

**Template:** (Resize to 8 1/2” x 11” by copying at 150%)

<table>
<thead>
<tr>

<th>6.</th>
<th>7.</th>
<th>8.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Gathering Grid *

**Purpose:**
To make subtle distinctions between similar ideas, people, events, places in a matched-structure format

**Thinking Skills:**
Analyzing, comparing, contrasting

**How to Use:**
Gather information on the grid by grouping common elements in the center column. Complete the information for each specific column.

*As described and illustrated in Bellanca, 1992

**Example:**

<table>
<thead>
<tr>
<th>BUSH</th>
<th>REAGAN</th>
<th>PRESIDENTS</th>
<th>LINCOLN</th>
<th>WASHINGTON</th>
</tr>
</thead>
<tbody>
<tr>
<td>50</td>
<td>50</td>
<td>states</td>
<td>Kept as is</td>
<td>13 Colonies</td>
</tr>
<tr>
<td>Republican</td>
<td>Republican</td>
<td>party</td>
<td>Republican</td>
<td></td>
</tr>
<tr>
<td>Iraq</td>
<td>Grenada</td>
<td>war(s)</td>
<td>Civil</td>
<td>Revolutionary</td>
</tr>
<tr>
<td>CIA</td>
<td>Movies</td>
<td>known for</td>
<td>Gettysburg Address</td>
<td>Cherry Tree</td>
</tr>
</tbody>
</table>

*Template: (Resize to 8 1/2” x 11” by copying at 150%)*
**K W P L** *

**Purpose:**
To use prior knowledge about something as a bridge to a new concept or lesson

**Thinking skills:**
Recalling, analyzing, evaluating

**How to Use:**
- **K**= Know--brainstorm and list what you already know about a topic
- **W**= Want to Know--write questions about what you want to learn
- **P**= Predict--predict what you will learn
- **L**= Learned--review the topic after studying it and write what you learned

* As described and illustrated in Bellanca, 1992 and Winebrenner, 1996

**Example:**

<table>
<thead>
<tr>
<th>Topic: Illinois</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>K</strong></td>
</tr>
<tr>
<td>Lake Michigan</td>
</tr>
<tr>
<td>Chicago/biggest city</td>
</tr>
<tr>
<td>Abe Lincoln</td>
</tr>
<tr>
<td>Chicago Bears</td>
</tr>
<tr>
<td>Corn crops</td>
</tr>
<tr>
<td>Springfield/capital</td>
</tr>
<tr>
<td>Prairies</td>
</tr>
<tr>
<td>Farms</td>
</tr>
</tbody>
</table>

Template: (Resize to 8 1/2” x 11” by copying at 150%)
**Mapping** *(also called concept web or semantic map)*

**Purpose:**
To identify characteristics or attributes of a topic and group them in a visual pattern to show a concept

**Thinking Skills:**
Listing, gathering, summarizing

**How to Use:**
Choose a category or topic and identify its characteristics or attributes. Create subcategories to describe the characteristics or attributes.

* as illustrated by Mikulecky (1985) as cited by Hudelson, 1995

---

**Example:**

Name(s): 

Topic: 

**Webbing**

---

*Template: (Resize to 8 1/2” x 11” by copying at 150%)*
PMI *

Purpose:
To evaluate and extend understanding about facts, concepts, thinking processes, and cooperative interactions

Thinking Skills:
Evaluating, inquiring, decision-making

How to Use:
P = Plus--write down what you like or enjoy about a topic
M = Minus--write down what you dislike about a topic
I = Interesting Questions--write down what you would like to know about a topic or its pluses or minuses

* As described and illustrated in Bellanca, 1992

Example:

<table>
<thead>
<tr>
<th>Issue: Being a Cheerleader</th>
</tr>
</thead>
<tbody>
<tr>
<td>P (+) exercise, hard work, friends, fun, sports, popular, discipline, teamwork, well liked, uniforms, dance, ready for high school</td>
</tr>
<tr>
<td>M (-) hard work, cliché, practice time, snobs, discipline, phony, not a real sport, sexist</td>
</tr>
<tr>
<td>I (?) How much skill does it take? How do they pick cheerleaders? How does cheerleading hurt or help our grades? Why does our class have the best squad? Why aren't there boy cheerleaders for girls’ teams?</td>
</tr>
</tbody>
</table>

Template: (Resize to 8 1/2” x 11” by copying at 150%)

Name(s): ____________________________________________ Topic: __________________________________________

| Issue: ____________________________________________ |
| P (+) | ____________________________ |
| M (-) | ____________________________ |
| I (?) | ____________________________ |
**Prediction Tree** *

**Purpose:**
To make predictions about a character or event in a reading selection

**Thinking Skills:**
Predicting, inferring

**How to Use:**
Project ahead in a story by listing possible or probable outcomes. Support the predictions with clues or proof.

*As described and illustrated in Bellanca, 1992

**Example:**

**Title:** The Old Man and the Sea

- They are both near the dock.
  - (proof)
- They will both go fishing.
  - (prediction)
- They are taking about the boat.
  - (proof)
- The man will go fishing alone.
  - (prediction)
- The boy will catch a big fish.
  - (prediction)
- Why else was boy character introduced into storyline?
  - (proof)
- The title is about the old man.
  - (proof)
- You’ve just met the two characters. What do you think will happen next? Why?
  - (prediction)

**Template:**
(Resize to 8 1/2” x 11” by copying at 150%)

**Name(s):**

**Topic:**

**Prediction Tree**

**Title:**

**Question:**

---

*As described and illustrated in Bellanca, 1992
Problem-Solving Chart *

**Purpose:**
To pose and solve problems

**Thinking Skills:**
Problem posing, alternative seeking, analyzing, evaluating, sequencing, priority setting

**How to Use:**
Apply an IDEAS framework to a problem scenario or assess knowledge of a concept or event.
- **I** = Index the facts as you see them.
- **D** = Define problem.
- **E** = Expand on possible alternatives.
- **A** = Adopt a criterion.
- **S** = Select and sell your idea to others involved.

* As described and illustrated in Bellanca, 1992

**Example:**

<table>
<thead>
<tr>
<th>I</th>
<th>D</th>
<th>E</th>
<th>A</th>
<th>S</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Students yell across table, clash trays, high pitch</td>
<td>- Students not controlling loudness</td>
<td>- Quiet signs and signals - Air raid siren</td>
<td>- Ban the noisiest - Quiet-checker at table</td>
<td>- Students can hear to the other end of table - Students use “six-inch” voices</td>
</tr>
</tbody>
</table>

Template: (Resize to 8 1/2” x 11” by copying at 150%)

**Problem-Solving Chart**

Name(s): ____________ Topic: ____________

Problem: ____________
Question Matrix *

Purpose:
To compare and contrast attributes, qualities or characteristics

Thinking Skills:
Analyzing, comparing/contrasting

How to Use:
Put answers to a factual question about two or more objects, individuals, or ideas in a matrix format.
In a situation matrix, replace the question column with personal characteristics of persons in fiction or history (e.g., thoughtful, caring, brave). In the right columns enter situations in which the person(s) displayed the characteristic.

* As described and illustrated in Bellanca, 1992

<table>
<thead>
<tr>
<th>Subject: Two Countries</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mexico</td>
</tr>
<tr>
<td>Who are the natives?</td>
</tr>
<tr>
<td>What Europeans first settled?</td>
</tr>
<tr>
<td>What are the chief products today?</td>
</tr>
<tr>
<td>How does the economy of each compare?</td>
</tr>
</tbody>
</table>

Example:

Name(s): _____________________________  Topic: _____________________________

| Question Matrix |
|-----------------|-----------------|
|                 |                 |
|                 |                 |
|                 |                 |
|                 |                 |
|                 |                 |
|                 |                 |
|                 |                 |
|                 |                 |
|                 |                 |
|                 |                 |
|                 |                 |
|                 |                 |
The Scales *

**Purpose:**
To weigh, evaluate, or make balanced judgments about facts, ideas, or values

**Thinking Skills:**
Analyzing, evaluating, decision-making

**How to Use:**
Choose a topic to evaluate. Choose two items related to the topic. Identify a criterion to evaluate the items. List attributes, characteristics, or descriptions to evaluate the item against the criterion. “Weigh” the item that best fits the criterion.

* As described and illustrated in Bellanca, 1992

**Example:**

**Subject:** The Seasons

**Item 1**
- sharp outlines
- snow blanket
- winterwonderland
- quiet
- snowballs

**Item 2**
- many colors
- green and fresh flowers
gardens
- shade
- vegetables

**Criterion:** Most beautiful

**Template:**
(Resize to 8 1/2” x 11” by copying at 150%)

Name(s): ____________________________  Topic: ____________________________

Subject: ____________________________

**The Scales**

Criterion: ____________________________
Structured Overview *

**Purpose:**
To group similar items and list characteristics or attributes in a visual pattern.

**Thinking Skills:**
Listing, gathering

**How to Use:**
Determine a category or topic that shares common characteristics or attributes. Create subcategories to describe the characteristics or attributes.

* as illustrated by Mikulecky (1985) as cited by Hudelson, 1995

**Example:**

```
  Food
  | Nutrients
  |   |
  |   |
  |   |
  |   |
```

**Template:** (Resize to 8 1/2” x 11” by copying at 150%)

  |   |
  |   |
  |   |
```

**Template:** (Resize to 8 1/2” x 11” by copying at 150%)

Name(s): ___________________________  Topic: ___________________________

Structured Overview

```
  Food
  | Nutrients
  |   |
  |   |
  |   |
  |   |
```

**Template:** (Resize to 8 1/2” x 11” by copying at 150%)

Name(s): ___________________________  Topic: ___________________________

Structured Overview

```
  Food
  | Nutrients
  |   |
  |   |
  |   |
  |   |
```
T-Chart *

**Purpose:**
To clarify central concepts or ideas; to collect specific examples for an idea or behavior

**Thinking Skills:**
Specifying, categorizing

**How to Use:**
In the “looks like” column, list all the behaviors or observable characteristics related to a topic; in the “sounds like” column, list all the sounds or audible characteristics, including possible verbal messages.

---

*As described and illustrated in Bellanca, 1992

---

**Example:**

<table>
<thead>
<tr>
<th>CONSENSUS</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Looks like:</strong></td>
</tr>
<tr>
<td>nodding head</td>
</tr>
<tr>
<td>eye contact</td>
</tr>
<tr>
<td>smile</td>
</tr>
<tr>
<td>attention</td>
</tr>
</tbody>
</table>

---

**Template:** (Resize to 8 1/2” x 11” by copying at 150%)

Name(s): ____________________________  Topic: ____________________________

Title: ______________________________

<thead>
<tr>
<th>T-Chart</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Looks like:</strong></td>
</tr>
<tr>
<td>-----------</td>
</tr>
<tr>
<td></td>
</tr>
</tbody>
</table>
Timeline *

**Purpose:**
To arrange information about a character or event in a sequential pattern

**Thinking Skills:**
Sequencing

**How to Use:**
Arrange times and events together in chronological order; that is, in the sequence in which they happened.

* as illustrated by Mikulecky (1985) as cited by Hudelson, 1995

**Example:**

<table>
<thead>
<tr>
<th>John F. Kennedy</th>
</tr>
</thead>
<tbody>
<tr>
<td>1917</td>
</tr>
<tr>
<td>1952</td>
</tr>
<tr>
<td>1960</td>
</tr>
<tr>
<td>1962</td>
</tr>
<tr>
<td>1963</td>

**Venn Diagram**
This section focuses on strategies for planning instruction to meet diverse learning needs in the foreign language classroom. Much of it is based on the learning theories and instructional models that were discussed in previous sections.

The first part of the section contains general strategies for diverse learners in the foreign language classroom (Figure M). The series of suggestions are grouped to address specific kinds of learning needs, but the strategies also may be beneficial to other students in the same classroom. The teaching strategies are followed by an example of the use of Bloom’s taxonomy in the foreign language classroom (Figure N) and an example of a thematic unit designed for a foreign language class (Figure O).

Sample units make up the rest of this section. The units correlate with learning scenarios in the Nebraska K-12 Foreign Language Frameworks and provide models of how the learning scenarios may be adapted to address diverse learning needs.

---

### General Strategies in the Foreign Language Classroom

**Teaching Strategies for Students with Diverse-Learning Needs**

**General considerations for meeting student needs:**

*Selecting and using the following approaches will add variety to classroom teaching and, more importantly, will assist the wide variety of learners within the classroom toward mastering the concepts of a lesson.*

- Relate learning activities to personal real-life skills and experiences.
- Model assignment expectations by showing an example of the product.
- Limit expectations to two or three well-developed concepts per unit.
- Be aware of academic levels of students so that reading, vocabulary, and other issues can be addressed.
- Use projects rather than traditional testing for evaluation.
- Concentrate on student strengths and bring those strengths into the lesson.
- Use concise written and oral directions.
- Provide lecture outlines.
- Pre-teach concept vocabulary; use pre-reading clues.
- Use pictures, concept mapping, webbing, and graphic organizers.
- Require short answers as well as long essay answers; e.g., testing, oral response.
- Create large and small group activities.
- Use multiple intelligences approaches to teach the same lessons.
Considerations for Meeting Specific Learning Needs in Skill and Instructional Areas

The following suggestions are grouped to address specific kinds of learning needs, but the strategies also may be beneficial to other students in the same classroom.

► To ensure student success with reading . . .

- use pre-reading and post-reading activities to pre-teach or reinforce main ideas.
- use before, during, and after reading strategies; e.g., before–preview questions; during–pausing to reflect; after–self-evaluation, summary
- provide advanced organizers when showing videos.
- use peer tutoring.
- provide audio-taped materials (text or study guides).
- teach self-questioning.
- paraphrase key points and/or have students paraphrase key points
- summarize key points and/or have students summarize key points
- label main ideas.
- label 5W’s - who, what, when, where, why.
- allow highlighting of texts, passages, key words, or concepts.
- use visual imagery.
- explain idioms that appear in reading passages.
- allow silent pre-reading.
- allow partner reading.
- use computer programs or games.
- allow students to quietly read aloud (sub-vocalization).
- use graphic organizers.
- use preparatory set; i.e., talk through what a reading passage is about using new vocabulary and concepts.

► To ensure student success with writing . . .

- shorten writing assignments.
- require lists instead of sentences.
- dictate ideas to peers.
- provide note takers.
- allow student to use a tape recorder to dictate writing.
- allow visual representation of ideas.
- provide a fill-in-the-blank form for note taking.
- allow student to use a computer for outlining, word-processing, spelling, and grammar check.
- provide a structure for the writing.
- allow collaborative writing.
- provide a model of the writing.
- allow use of different writing utensils and paper.
- use a flow chart for writing ideas before the student writes.
- brainstorm a word bank of possible words that would be needed prior to the writing activity.
- narrow the choice of topics.
- grade on the basis of content; do not penalize for errors in mechanics and grammar.
- allow choices of manuscript, cursive, keyboarding.
- allow different positions of writing paper and/or surfaces.
To ensure student success with speaking . . .

- give sentence starters.
- use graphic organizers to organize ideas and relationships.
- use visuals.
- allow extra response time for processing.
- use cues and prompts to help the student know when to speak.
- use partners.
- phrase questions with choices embedded in them.
- use choral reading or speaking.
- use rhythm or music.
- allow practice opportunities for speaking.
- practice role playing activities.

To ensure student success with attending . . .

- use preferential seating.
- use proximity to measure on-task behavior.
- provide opportunities for movement within a lesson.
- use self-monitoring strategies.
- provide a structure for organization.
- help the student set and monitor personal goals.
- provide alternative work areas.
- decrease distractions.
- use active learning to increase opportunities for student participation.
- provide opportunities to change tasks or activities more frequently.
- break tasks into the smallest possible chunks.
- provide reminder cues or prompts.
- use private signal to cue appropriate behavior for more difficult times.
- teach skills of independence; e.g., paying attention.
- provide definite purpose and expectations especially during unstructured activities.
- prepare the student for changes in the routine.
- use computers.
- use graphic organizers.
- reduce assignment length.

To ensure student success with following classroom rules . . .

- teach rules and expectations.
- model and role-play rules and expectations.
- post rules and expectations.
- teach skills of independence.
- be consistent.
- use proximity.
- have students set personal goals.
- use self-monitoring strategies.
- use positive correction prompts.
- teach and use positive and negative consequences.

To ensure student success with organizing . . .

- use graphic organizers.
- use semantic mapping.
- teach time-management skills.
- post sequence of events.
- teach use of folder, notebooks, etc.
- teach how to clean a desk or locker.
- use assignment sheets.
- model how to think aloud when organizing a certain project.
- allow students to brainstorm and prioritize the important parts of a project or assignment.
To ensure student success when working in groups . . .

- teach group rules and expectations.
- teach skills of independence; e.g., bridging phrases, disagreeing agreeably, voice level.
- teach manageable strategies for moving in and out of groups within the classroom setting.
- post rules and expectations.
- give adequate time but not “fooling around” time.
- be in close proximity to groups as they work.
- teach students to self-monitor group progress.
- assign student roles or responsibilities in the group.
- teach a signal for getting attention of all groups.
- practice and assess student behaviors in small-group settings.
- use cooperative learning strategies.
- use a wide variety of groupings; e.g., flexible, cluster, skill

To ensure student success with understanding new concepts . . .

- pre-teach new concepts.
- identify priority learning from less important material
- provide adequate time.
- provide meaningful practice, review, repetition.
- use flow charts.
- connect previous learning to new information.
- use multiple means of learning the same material (visual, auditory, tactile).
- have student set personal goals.
- use peer tutors.
- use multiple intelligences information to deliver material in a variety of ways.
- use cooperative learning and small groups.
- provide cues.

To ensure student success with retaining and retrieving information . . .

- use multi-modalities (visual, auditory, tactile) to teach the same concept.
- teach vocabulary in context.
- use cues, prompts.
- use graphic organizers.
- use frequent repetition of key points.
- break down instructional units into smaller steps.
- show relationships among concepts through graphs, outlines, and webbing.
- use color coding to show concepts and relationships.
- use peer tutors.
- highlight important information.
- teach mnemonics as a memory tool.
- teach visual imagery.
- use rhythm, music, and movement.
- use lists.
- use matrix to organize information; allow students to construct some of their own.
- use pictographs.
In the Foreign Language Classroom

To ensure student success with representing new learning in assessment . . .

- use a variety of authentic assessments.
- establish criteria and expectations prior to instruction.
- teach test-taking strategies.
- teach the format of an upcoming test.
- allow adequate time for test taking.
- allow paper-pencil tests to be taken in a different space.
- allow a variety of ways to respond; e.g., orally, pictorially, tape recording.
- give choices.
- assess learning continuously over time, not just at the end of a unit of study.
- use rubrics.
- use self-assessment tools.

To ensure student success with motor skills, mobility, posture maintenance, manipulation of materials . . .

- allow alternatives to writing.
- allow adequate time for manipulation of materials.
- allow different postures.
- use physical cues
- use easy-to-handle concrete examples and models.
- position materials for easy access and individual use.
- provide adaptive equipment.
- be aware of the impacts of room arrangement.
- be aware of the impacts of the physical positioning of the individual.
- use bold outlines on maps and charts.
- use peer tutors.
- be aware of tasks that require eye movement from one plane to another.
- be aware of the student level of fatigue.
- position all participants at the same eye level during small-group discussion.

To ensure student success with hearing-impaired learners . . .

- provide preferential seating.
- use visual cues (overheads, drawings, maps, demonstrations, visual samples of new vocabulary).
- face student directly when speaking.
- emphasize key points; don’t overload with information.
- repeat or rephrase what other students say—hearing what other students say is often difficult for hearing-impaired students.
- highlight text and study guides.
- provide note-taking assistance during lectures to allow hearing-impaired student to concentrate on the teacher.
- use peer tutoring.
- use study sheets to organize information.
- pre-teach vocabulary.
- use captioned videos, films, etc.
- show videos or visuals before presenting information to provide a knowledge base for students.
- use alternative testing methods.
- minimize background noise.
- simplify vocabulary.
- use pre-printed outline of materials.
To ensure student success with **visually-impaired learners** . . .

- describe what you are doing.
- provide preferential seating.
- provide material in large or braille print.
- give student an individual copy of visual information presented to the group.
- use black and white printed handouts.
- use audio-taped books.
- use tactual materials to represent concepts--contact a vision consultant to assist with the design.
- be aware of lighting requirements.
- stand away from window glare when talking to the student.
- allow extra time to complete a task.

To ensure success with **gifted and high ability learners** . . .

- allow for choice within assignments and projects.
- use compacting.
- allow students to make independent plans for independent learning.
- provide mentoring or apprenticeship with professionals.
- teach entrepreneurship.
- use theory of multiple intelligences.
- use tiered assignments which are more complex or abstract.
- use Socratic questioning.
- use critical and creative questioning strategies.
- use open-ended questioning strategies.
- use interdisciplinary units.
- allow in-depth enrichment learning.
- allow time with like-intellectual peers.
- use accelerated pace of instruction.
- allow dual enrollment or early admission opportunities.
- remove time and space restrictions to allow for a long-term integrated plan of study.
- provide more difficult or abstract resources.
- allow for concrete or real-life investigations and explorations.
- teach coping skills.
- allow students to suggest modifications in the content of their learning, the process which they use to learn, and the product they produce to show their learning.
- clearly communicate criteria and parameters to avoid students taking unacceptable risks or creative detours.
Bloom’s Taxonomy and the Nebraska Foreign Language Frameworks

Adapted by Marie Trayer, Frameworks Project (1997) Note: Beginning, Developing and Expanding refer to the Frameworks progress indicators.

Sample Units

The sample units in this section have been adapted to accommodate different abilities, learning styles, and special learning needs. Several of the units are based on the learning scenarios of the Nebraska K-12 Foreign Language Frameworks and show how a scenario may be adapted for specific learning needs. Others were copied with permission from Teaching Strategies for Students with Diverse Learning Needs, an addendum to the Nebraska Social Studies Framework (1996). The Social Studies units correlate well with activities in the foreign language classroom and illustrate how foreign language can connect with other disciplines (Frameworks Goal Three).

Adapting a Unit to Accommodate Special Learning Needs

The first sample unit is based on the foreign language learning scenario, House and Home (page 100) and illustrates the many ways a unit might be adapted to ensure success by students with a diversity of learning needs in the foreign language classroom. The area(s) of special learning needs for which each strategy might be used effectively is indicated with a check mark. (Also see the strategies listed for these areas beginning on page 301.)

Sample 1

Title: Strategies for “House and Home”

Strategy: Providing alternative strategies for communication

Activity Summary:
Students create a house and home
Based on Learning Scenario: House and Home, page 100

Intended Level: Beginning

Reflects Frameworks:

Goal One: Communication
Standard 1.1 Students engage in conversations, provide and obtain information, express feelings and emotions, and exchange opinions.
Standard 1.2 Students understand and interpret written and spoken language on a variety of topics.
Standard 1.3 Students convey information, concepts, and ideas to listeners and readers for a variety of purposes.

Context/Outcomes:
The student will be able to convey information by describing a house plan in the target language.

Strategies for Implementation and Planning:
See charts on pages 310 and 311.
### Strategies for Planning and Implementation—House and Home, cont.

The check marks indicate areas of learning needs that may benefit from the following strategies as adapted for the learning scenario, House and Home, page 100.

6. Contracting: Students contract for a grade according to the number of projects completed from a given list of activities/projects. Organizational management techniques:

- Use preset timelines to help students avoid procrastination.  

- Use progress logs to document progress throughout the contract period.  

- Establish criteria for success. *(See section on assessments.)*

7. Tiered Assignments: The teacher varies the levels of activities to ensure that students can apply concepts at their instructional level. The teacher chooses and assigns a task and presentation according to a student's skill and instructional level. Example: Step #4-creating house visuals--concrete to more abstract

- Students cut pictures of rooms out of the newspaper and identify them using target vocabulary  

- Students orally or physically identify rooms in a doll house or three-dimensional model  

- Students draw and identify parts of a dreamhouse  

- Students use a computer to generate a floor plan  

- Students perform role plays; e.g., a real estate agent trying to sell a house, an architect designing a house, or an artist decorating a home

8. Questioning techniques: Base questions on Bloom's Taxonomy

- Knowledge: "What is this?" (given a picture)  

- Comprehension: "What is next to the bathroom?" (given a picture)  

- Application: "In what room would you put the sofa?"  

- Evaluation: "What is your favorite room in the house and why? Which is your favorite house plan and why?"

Questions are given according to student's level and ability.
Title: Strategies for “Dining” (high-ability learners)

Strategy: Providing challenging options for the high-ability learner

Activity Summary:
Students explore and experience the dining practices of the target culture.
Based on Learning Scenario: Dining, page 93

Intended Level: Beginning

Reflects Frameworks:

Goal One: Communication
Standard 1.1 Students engage in conversations, provide and obtain information, express feelings and emotions, and exchange opinions.
Standard 1.2 Students understand and interpret written and spoken language on a variety of topics.
Standard 1.3 Students convey information, concepts, and ideas to listeners and readers for a variety of purposes

Goal Two: Cultures
Standard 2.1 Students demonstrate an understanding of the relationship between the perspectives and practices of cultures studied and use this knowledge to interact effectively in cultural contexts.

Goal Three: Connections
Standard 3.1 Students reinforce and further knowledge of other disciplines through foreign languages.

Goal Four: Comparisons
Standard 4.2 Students recognize that cultures use different patterns of interaction and can apply this knowledge to their own culture.

Goal Five: Communities
Standard 5.1 Students apply language skills and cultural knowledge within and beyond the school setting.

Context/Outcomes:
Students identify the similarities and differences between dining practices in the U.S. and the target country.

Strategies for Implementation:

1. Set up learning center options:
   - Using realia/authentic menus, students analyze costs and currency of the target culture compared to the U.S.
   - Using menus from the target culture, students make inferences about what food is popular and compare it to a restaurant in their own city using a Venn diagram.
   - Students use the Internet, interviews with native speakers, and the library to research and prepare a presentation for the class on the dining practices of the target culture and the U.S.
   - After studying four authentic menus, students write descriptions of each restaurant and provide a rating for each and explain why.
2. Students create an authentic menu including prices, beverages, lunches, dinners, type of restaurant, etc.

3. After studying menus from the target culture, students go to a similar restaurant with their families and make inferences between a U.S.-style restaurant and one from the target culture and present their observations to the class.

4. Students write a letter to the person responsible for the school cafeteria and ask for new selections of ethnic food from the target culture.

5. Students find and prepare a recipe from the target culture at home and make a report to the class about their families’ preferences.

Materials/Resources Needed:

- computer capability
- Internet
- authentic menus
- library
- calculators
- currency exchange chart
- currency of the target culture
Title: Strategies for “Dining” *(multiple modalities)*

Strategy: Teaching to multiple modalities

Activity Summary:
Students practice vocabulary to be used in the learning scenario.
Based on Learning Scenario: Dining, page 93

Intended Level: Beginning

Reflects Frameworks:
Goal One: Communication
Standard 1.1 Students engage in conversations, provide and obtain information, express feelings and emotions, and exchange opinions.

Context/Outcomes:
Students understand, interpret, and express opinions about a menu in the target language.

Strategies for Implementation:
Practicing food vocabulary listed on the menu for:

- **Auditory learners**
  1. The teacher continuously repeats the menu food items in the target language.

- **Visual learners**
  1. The teacher repeats the menu food items/list using flashcards with the words and pictures on each card.
  2. The teacher uses props (e.g., plastic food) while repeating the food items/list. Kinesthetic learners.

- **Kinesthetic learners**
  1. Students use gestures imitating how they eat certain foods when they hear the vocabulary word; e.g., peeling a banana.
  2. Students hold up representations, pictures, or written vocabulary words to answer questions asked in the target language about the menu items/list.
  3. Students retrieve items (props) they hear in the target language and bring them to other students.

Materials/Resources Needed:
- Flashcards of food and drinks that include both a picture and the word written in the target language on the same side as the picture.
- Props or representations of foods; e.g., plastic fruit
Title: Strategies for “Dining” (reading/attending/organizing)

Strategy: Ensuring success with reading, attending, and organizing

Activity Summary:
Students explore and experience the dining practices of the target culture.
Based on Learning Scenario: Dining, page 93

Intended Level: Beginning

Reflects Frameworks:

Goal One: Communication
Standard 1.3 Students convey information, concepts, and ideas to listeners and readers for a variety of purposes.

Goal Two: Cultures
Standard 2.1 Students demonstrate an understanding of the relationship between the perspectives and practices of cultures studied and use this knowledge to interact effectively in cultural contexts.

Goal Four: Comparisons
Standard 4.2 Students recognize that cultures use different patterns of interaction and can apply this knowledge to their own culture.

Context/Outcomes:
Students identify the similarities and differences between dining practices in the U.S. and the target culture.

Strategies for Implementation:

1. Pre-reading activity: Students use a compare-and-contrast diagram (Venn or other) to brainstorm ideas from their own dining experiences and answer questions about what they ate, at what time, with whom, etc. Students fill out the section of the diagram that refers to dining characteristics in the U.S.
2. Students watch a video clip showing persons from the target culture eating a meal and write down the dining characteristics of the target culture that they observe on the video.
3. Students read English text about dining customs of the target culture — one person records the key points, one person reads the text, one person reads the questions about the text. All students answer.
4. As a class, students fill in dining characteristics of the target culture on the diagram.
5. As a class, students discuss and write similarities (or differences) between the two cultures.

Materials:
Black Line Masters—Reading Instructions that Make Sense
Title: Strategies for “Fashion Show” *(high-ability learner)*

Strategy: Providing critical thinking tasks for the high-ability learner; Bloom’s taxonomy

Activity Summary:
Students communicate about clothing.
Based on Learning Scenario: Fashion Show, page 95

Intended Level: Developing

Reflects Frameworks:

Goal One: Communication

- Standard 1.1 Students engage in conversations, provide and obtain information, express feelings and emotions, and exchange opinions.
- Standard 1.2 Students understand and interpret written and spoken language on a variety of topics.
- Standard 1.3 Students convey information, concepts, and ideas to listeners and readers for a variety of purposes.

Goal Two: Cultures

- Standard 2.1 Students demonstrate an understanding of the relationship between the perspectives and practices of cultures studied and use this knowledge to interact effectively in cultural contexts.

Goal Four: Comparisons

- Standard 4.1 Students recognize that different languages use different patterns to communicate and can apply this knowledge to their own language.

Context/Outcomes:
Students express their likes or dislikes about clothing and describe selected clothing items in the target language.

Strategies for Implementation:

1. Students research holidays or special events in the target culture, looking for differences in attire for those events. *(Bloom’s—analysis)*
2. Using familiar vocabulary words from the target language, students write an invitation to a gathering (formal or informal); e.g., a swimming party, a trip. *(Bloom’s—synthesis)*
   In a follow-up activity, classmates randomly pick one of the invitations and describe appropriate clothing items to pack for the activity.
3. Students design (draw or sew) a costume from the target country or region and describe it in a presentation in the target language to an audience. *(Bloom’s—synthesis)*
4. Students use Internet, e-mail, or write to a pen pal from the target region to obtain pictures of people in the target culture wearing current clothing styles; e.g., photos of the pen pal and friends, pictures from magazines and newspapers, etc. *(Bloom’s—application)*
5. Using HyperStudio, students create a format of a department store with a variety of clothing and prices. A situation is set up in which a person traveling in the target culture has lost a suitcase and must use a specified (assigned) amount of money to replace the most important clothing items for the rest of the visit. After making the “purchases,” the student (player) communicates orally or in writing why each item was chosen. *(Bloom’s—synthesis, evaluation)*

Materials/Resources Needed:
- research materials on cultural events and holidays in the target culture
- list of names and addresses for pen pals
- computer/Internet/HyperStudio
Title: Strategies for “Fashion Show” (*multiple modalities*)

Strategy: Teaching to multiple modalities (visual and kinesthetic learners)

Activity Summary: Students practice vocabulary for a role play about clothing. Based on Learning Scenario: Fashion Show, page 95

Intended Level: Developing

Reflects Frameworks:

Goal One: Communication

Standard 1.1 Students engage in conversations, provide and obtain information, express feelings and emotions, and exchange opinions.

Standard 1.2 Students understand and interpret written and spoken language on a variety of topics.

Standard 1.3 Students convey information, concepts, and ideas to listeners and readers for a variety of purposes.

Context/Outcomes: Students express their likes or dislikes and describe clothing items in the target language.

Strategies for Implementation:

1. Teacher and/or students use gestures to mimic vocabulary words while saying the word; e.g., glove—mimic putting on a glove.
2. Students use dolls or paper dolls and describe what they are wearing, changing outfits one or more times.
3. Students attach flash cards of clothing vocabulary words in the target language to a poster or live model to indicate where/how the clothing is worn.
4. Students bring in and label different clothes to be used as props (see #5).
5. Teacher/students provide scenarios of different activities on a trip. Students, using a suitcase and clothing props, pack appropriate clothing for the activity, situation, or weather, describing the clothing and explaining why it was chosen.

Variation: Students translate invitations written by a classmate (see “Fashion”—high-ability learner). Using provided clothing and a suitcase, students pack the suitcase with appropriate clothing for the occasion.

Materials/Resources Needed:

- clothing items
- vocabulary cards
- dolls or paper dolls with different changes of clothes
Title: Strategies for “Guide through A City”  
(multiple intelligences, high-ability learner)

Strategy: Providing options for high-ability learners and multiple intelligences

Activity Summary:
Read a written paragraph and follow directions given in the paragraph to draw a path on a city map.  
Based on Learning Scenario: Guide through a City, page 99

Intended Level: Beginning

Reflects Frameworks:

Goal One: Communication  
Standard 1.1 Students engage in conversations, provide and obtain information, express feelings and emotions, and exchange opinions.

Goal Two: Cultures  
Standard 2.1 Students demonstrate an understanding of the relationship between the perspectives and practices of cultures studied and use this knowledge to interact effectively in cultural contexts.

Goal Three: Connections  
Standard 3.1 Students reinforce and further knowledge of other disciplines through foreign languages.

Goal Four: Comparisons  
Standard 4.1 Students recognize that different languages use different patterns to communicate and can apply this knowledge to their own language.  
Standard 4.2 Students recognize that cultures use different patterns of interaction and can apply this knowledge to their own culture.

Context/Outcomes:
The student will be able to understand and respond to given directions when following/drawing a path on a map.

Strategies for Implementation:

◆ Multiple intelligences:  
  1. Spatial/Visual intelligences  
    - Teacher shows differences between cities in the target culture using diagrams on an overhead transparency. (Obtain maps from travel agencies or Internet map sites.) Students create their own maps.
  2. Spatial/Linguistic intelligences  
    - Students reproduce a city to scale using posterboard, plastic cut into sections, or transparencies adding stores or shops, as appropriate. Using the model/map, students choose routes to different sites. Students work in groups of three and give and follow directions in one of the following ways:

  Variation #1:  
  - Student 1 writes directions to a site and tells student 3 the intended destination.  
  - Student 2 follows the written directions to point out the route on the model/map.  
  - Student 3 judges whether the intended destination is reached.  
  - Students rotate in the roles of persons 1-3.
Variation #2:
- Student 1 reads his/her own directions
- Student 2 listens to the directions and points out the route (or uses a model car) on the map/model.
- Student 3 listens and assesses the accuracy of the directions and the response to the directions.
- Students rotate in the roles of persons 1-3.

Variation #3:
- Students 1 and 2 stand back to back; each has a map.
- Student 1 verbally gives directions while tracing a route on the map.
- Student 2 listens to the directions and points out the route on the second map.
- Student 3 observes and evaluates.
- Students rotate in the roles of persons 1-3.

3. Logical/Mathematical Intelligence
   Students estimate/record distances in kilometers for routes and compare the routes.

4. Intrapersonal intelligence
   Students imagine being lost in the city and identify their personal feelings about the situation.

5. Linguistic intelligence
   Students imagine being lost in a city/place and ask for directions.

High-ability learners:

1. After testing out/demonstrating proficiency, native speakers or proficient learners choose alternative learning tasks; e.g., researching points of interest in a city for a vacation or trip and explaining how they would travel from place to place.

2. Tiered Assignments
   In a scavenger hunt for various levels of instruction (from concrete to abstract tasks):
   - Require students to locate fewer items; provide fewer and less complex directions; start with a familiar place and provide peer or staff support, if needed
   - Provide additional directions that are more complex; students move through more locations, independently. Students record the route on a map or diagram.
   - Provide complex directions through many locations and/or with greater difficulty in the sequence of directions. Students record the route.
   - Students design a scavenger hunt for peers and design an answer key to be used with the hunt.

3. Interest Centers
   Students are assigned centers of different cities in the target culture and draw maps illustrating points of interest in those cities. Students explain a map and give directions to the points of interest; e.g., the Eiffel Tower in Paris, France.

Materials:
- City map with written directions relevant to that map

Nebraska K-12 Foreign Language Frameworks
Title: The Family Tree *(with strategies for special learning needs)*

Strategy: Providing options for special learning needs using graphic organizers; charts, maps

Activity summary: Students explore family name, derivation, heritage, genealogical connections. Based on teacher-designed unit that spans the school year.

Intended level: beginning and developing

Reflects Goals and Standards:

- **Goal 1: Communication**
  - Standard 1.1 Students . . . provide and obtain information . . .

- **Goal 2: Cultures**
  - Standard 2.1 Students demonstrate an understanding of the relationship between the perspectives and practices of cultures studied . . .

- **Goal 3: Connections**
  - Standard 3.1 Students reinforce and further knowledge of other disciplines through foreign languages.

- **Goal 4: Comparisons**
  - Standard 4.2 Students recognize that cultures use different patterns of interaction and can apply this knowledge to their own culture.

Context/Outcomes: Students recognize that cultures use different patterns of family structures and customs and apply this knowledge to their own culture.

Steps for Planning and Implementation (Unit)

1. Students “search for self,” in which they study their given and family names to establish an understanding of their own heritage and add significance to their study of language and culture. *[Note: Give students who have no knowledge of family heritage the opportunity to create an imaginary family and origin—some creative ones might include a child as result of an alien visit to this planet or a famous person’s name]*
   - Use the official name that has been given to the individual. Access a variety of sources to aid in research; for example, resources on names collected by the library/media specialist, websites, and family members.
   - Students explore how they received their given and family names; for example, what their parents may have debated and discussed before deciding on the name. (See Graphic Organizer A for collecting information.)
   - Students research the significance or “meaning” of their names. Special attention should be given to the name as a reflection of a cultural heritage. Resources might include books on selecting a baby’s name, or name dictionaries.
   - Students research the genealogical heritage of their names. (Resources might include web sites such as Ellis Island and Salt Lake City,)
Students develop family trees or other products to introduce their families to the class.

- Students may brainstorm possible ways to show significant aspects of their family; for example, their ethnic heritage, genealogy, country/city of origin, length of time in the U.S.
- Students should be offered choices as to how the material they gather on their families will be presented to the class to allow for individual expression and talents. Choices of products to share might be: a coat of arms, rap, song, poem, pictures or symbols to represent family members, a collage, a video tape of family interviews.

2. The activities of “search for self” begins an opportunity to collect in a portfolio materials studied during the first year of a foreign language. Students continue to add materials about family and cultural identity to the portfolio during the first year of their foreign language study. Additional products would revolve around the target language family created (in Step 3) and reflect the students’ growing abilities to master vocabulary (family members, body parts, clothing, etc.) and demonstrate increasing proficiency. Both written and audio presentations may be included.

3. Students create a target-language family of 12 to 20 members.

- The class creates the family by working in groups. Each group is assigned a particular task—to create the characters, draw, color, etc. This could also be arranged as a collaborative project in which smaller groups of students are individually responsible for the tasks that need to be completed.
- Students brainstorm information about the family; such as, names, ages, occupations, the city in which they live.
- Place the family depiction in the classroom for reference during the course of the school year. (Make individual copies for students to put in their portfolios.) The target-language family can be used for generating oral communication involving feelings, physical and personality characteristics, or school subjects; such as, classes the individuals liked or needed to complete to prepare for current occupation.

4. Students study aspects related to the target-language family throughout the school year and add products created to their portfolios.

- Students consider and discuss the world-view of families, then learn about families in the target-language culture; for example, family dynamics (who is in control), relationships among family members, etc.
- Students investigate the foreign city selected for the target-language family, learn the city’s history, customs, interesting sites, etc.

5. Bring the unit full circle by the end of the school year. The class began by individually researching their names and then spreading their base of information to names of families in the target culture and places in foreign lands. The focus now returns to the “individual” interest by investigating information about the students’ own city and expanding it to include other community members. Create a large map with in-roading trails illustrating the various origins and heritages of the students in the class.

- Some students could demonstrate their math skills by illustrating the percentage of individuals who are of a particular ancestry; such as, British, German, or Mexican.
- Some students might talk to older family members or visit retirement homes to talk with individuals regarding their memories of changing neighborhoods and how different ethnic groups were received. (See Graphic Organizer B.)
Some students might research old newspaper stories, pictures, and headlines as a way to demonstrate changes as different cultural groups joined and were assimilated into the community.

The map and the information gathered can be shared with the city council, community outreach organizations, social studies classes within the school, and other interested groups and organizations.

Individuals who like to work interpersonally (multiple intelligences) might interview an ESL student and together create that student’s coat of arms, symbols representing the ESL student’s family, or a collage to share with the class.

Adaptations for students with special needs

1. Organizing information
   - Prepare a list of sources for students to use to research their names. Students should have had previous training on how to use sources (Internet, web sites, almanacs, etc.).
   - Provide an example of a completed search.
   - Provide a graphic organizer that students may use to gather required information (see Graphic Organizer C).
   - Family tree project: Provide a variety of graphic organizers to which students add information. (See graphic organizers D for examples.)
   - Allow choices for products in which students will share the information with the class.

2. Acquisition of vocabulary
   - Provide an array of visuals (flash cards, game activities, computer games, other books, periodicals) as a means to learn new vocabulary.
     – Provide materials that may used in the resource room, if applicable, or at home.
   - Provide opportunities for repetition.
   - Allow practice with a partner (less threatening for student).

3. Other suggestions for this unit:
   - As students move from one concept to another, bring closure to previous a unit or build upon it before moving to the next concept or unit.
   - Use a camera or video tape recorder so students may demonstrate a concept rather than give a written presentation.
   - When students work in groups, assign specific duties to each member so that students are not overwhelmed with decisions.
   - Be specific about deadlines. Give students a written itinerary/outline of the unit and include a detailed description of projects with due dates.

Materials/Resources Needed:
   - references for researching names and their meanings--books, web addresses
**Graphic Organizer A: Significance of one’s name**

**Graphic Organizer D:** Examples of a family tree
Title: **People, Places, and Environments**  
from *Nebraska Social Studies Framework: Teaching Strategies for Students with Diverse Learning Needs*

**Strategy:** Flexible Outlining for Writing

**Concept:** How does the culture shape individual identity?

**Activity:** Write a paper explaining how the student’s culture has influenced his/her life.

**Intended Student Level for This Example:** Upper Elementary Level

**Connecting Themes:**
- Culture
- Individuals, Groups, and Institutions

**Outcomes:**
The learner will organize appropriate data from the data bank and produce a written report.

**Procedures:**
- The writing activity would be preceded by a class discussion on aspects of our culture and local population groups (see example matrix form for technique).
- Using the headings in the matrix, the students will write their own personal data on sticky notes, one item per sheet (see example).
- Some items may need to be researched at home or through extended family.
- Students then cluster their sticky notes into appropriate categories that would provide connections for writing.

**Teacher Tips:**
- Sticky notes can be structured into work webs, charts, or outlines depending upon the nature of the task. Some students benefit from being able to physically manipulate the information rather than outlining in linear form. Writing from a personal viewpoint is easier for many students with language difficulties.
- Other possibilities for organizing ideas for writing include webs (made with pictures and/or words), outlines, matrixes, starter questions, and/or prompts.
- Alternative options for written assignments include using a word processing program, dictating into a tape player or to a scribe, picture representation, or using a generic form where students fill in the blanks.

**Resources:**
- Lots of sticky note

Students notes would be clustered on word web.
Title: **Cultures**

from Nebraska Social Studies Framework: Teaching Strategies for Students with Diverse Learning Needs

**Strategies:** Webbing

**Concept:** How/Why are cultures different or similar from place to place?

**Activity:** Use of webbing technique to understand the reasons and effects of migrations on the culture of the country of origin and the country of destination.

**Intended Student Level for this Example:** Middle or Secondary Levels

**Connecting Themes:** Time, Continuity, and Change

**Outcomes:** To determine the impact of migration on the culture and society in the country of origin and the country of destination.

**Procedures:** Show students an example of the web format:

![Central Concept](#)

- **Effect #1**
- **Effect #2**

**Evaluation:**
- Allow the use of the web on the unit test.
- Write a journal from the view of a migrant and show how the migration affected the country one left and the country to which one went.
- Journals could be modified by use of pictures, etc.

**Teacher Tips:**
- Practice webbing technique with family tree.
- Do a hanging classroom mobile.
- Pictorial representation of family tree including food, culture, language, traditions, etc.
- Follow-up activity could lead to a debate on the effects on society of providing social services to non-citizens. Discuss also why some countries won't allow for naturalization or emigration.
- Food day could add an interesting motivation for this activity.
- Interview relatives or neighbors in the community about their migration experiences.
- Provide guidelines, examples, leading questions, existing historical diaries for student journals.
- What aspects of your physical or cultural makeup can you trace through the family tree?
- What factors caused your ancestors to move from one place to another?
- Provide large print or tactual mapping materials.
Sample of Webbing: Effects of Migration

- Emigration
- Immigration

Less Pressure for Social Reform
Title: **Global Connections**

from *Nebraska Social Studies Framework: Teaching Strategies for Students with Diverse Learning Needs*

**Strategies:** Interviewing

**Concept:**

How do global connections affect the needs and wants and, therefore, production, distribution, and consumption of goods and services?

**Activity:**

Use of interviewing techniques to explore and determine the reasons for global connections of local businesses.

**Intended Student Level for This Example:** Middle or Secondary Levels

**Connecting Themes:**

People, Places, and Environments  
Production, Distribution, and Consumption  
Science, Technology, and Society  
Time, Continuity, and Change

**Outcomes:**

To develop an interview document for the purpose of surveying businesses on the topic of global connections.

**Procedures:**

- Pre-teaching the concept of global connections.
- Check clothing labels or “made in” statements of household or school equipment or products.
- Use telephone directory or chamber of commerce information to compile list of local businesses.
- Have a representative from the chamber of commerce speak to the class about the importance of foreign markets to the local community.
- Write letters or make calls to a business to set up the student interviews.
- Get parent and school permission forms signed and arrange for transportation (interviews could be done at school).
- Have students develop the interview form with teacher supervision.
- Do class role playing of a model interview.
- Conduct the interview. Consider taking camera, video cam, audio recorder, etc. to record the interview.
- Analyze the reasons for global connections.
- Write, map, chart, graph, picture, etc. the presentation.
- Write thank you notes.
Teacher Tips:
- Follow the world and local news to make connections between foreign and local events.
- Follow a foreign-owned company on the stock market to see relationship of world events to stock values.
- Discuss the issue of “Buy American.”
- Allow choice of individual, paired, or small group interview.
- Be careful with accuracy of direct quotes.
- Research use of child labor in foreign industries.
- Create and play a “Jeopardy” style game of foreign companies and products.
- Presentations could also be made to the chamber of commerce, city council, etc.
- Practice webbing with family tree.

Evaluation:
- Evaluation would be met appropriately by the presentation.
- Write a journal explaining how the student accomplished the task.
- Journals could be modified by use of pictures, etc.

Resources:
- Print: directory, city map, newspaper
- Electronic: use of Internet to find information about foreign companies
- Print: resources from state or local history association
- Electronic: genealogy home pages, etc.
**Glossary**

**assessment**  process of gathering information to monitor progress and make educational decisions

**compacting**  streamlining work that may be mastered at a pace appropriate to student ability

**concept diagram**  specific type of graphic organizer used to present vocabulary which includes definitions and characteristics

**concept map**  graphic organizer showing relationships among concepts of instruction as well as characteristics of the concept

**cooperative learning**  student-centered instructional approach in which students work in small mixed-ability groups with a shared learning goal

**disability**  condition characterized by a physical, cognitive, psychological, or social difficulty so severe that it negatively affects student learning. In the Americans With Disabilities Act, a disability is defined as a condition that limits some major life activity.

**gifted/high-ability**  demonstrated ability for above average performance in one or several areas, including ability, leadership, specific academic subjects, creativity, athletics, or the visual or performing arts

**graphic organizer**  visual format that helps students to organize their understanding of information being presented or read, and the relationships between various parts of the information

**mnemonics**  a device or code used to assist memory by imposing an order on the information to be remembered

**multiple intelligences**  a concept proposed by Howard Gardner (1993) that suggests there are seven types of intelligences (An eighth intelligence was added in 1997.)

**rubric**  an assessment tool listing expected student accomplishments, and a corresponding score for each area
a process to develop an internal schema for thinking about relationships in concepts by developing word association maps.

**semantic mapping**

strategy in which students are taught to guide their performance by asking themselves relevant questions.

**self-questioning**

Block, L. Workshop conducted at Educational Service Unit #6. Milford, Nebraska.

Moock, B. Workshop handout. Park Middle School: Lincoln, Nebraska.
Nebraska Department of Education (1996). *Nebraska social studies framework: Teaching strategies for students with diverse learning needs.* Lincoln, Nebraska: Nebraska Department of Education.

79-1105. State Department of Education; education for gifted children; consultant; employ; gifted children, defined.

The State Department of Education has authority to employ a special consultant trained and experienced in the field of special education for gifted children. Such consultant shall encourage, advise, and consult with each school of the state in the development and implementation of plans for special education of gifted children. For purposes of this section, gifted children means children who excel markedly in ability to think, reason, judge, invent, or create and who need special facilities or educational services or both such facilities and services in order to assist them to achieve more nearly their potentials for their own sakes as individuals and for the increased contributions they may make to the community, state, and nation.

79-1106. Learners with high ability; purpose of sections.

The purpose of sections 79-1106 to 79-1109 is to assist and encourage all school districts in the development, improvement, and implementation of educational programs or services that will serve the educational needs of learners with high ability at levels appropriate for their abilities.

79-1107. Learners with high ability . . . defined.

(3) Learner with high ability means a student who gives evidence of high performance capability in such areas as intellectual, creative, or artistic capacity or in specific academic fields and who requires services or activities not ordinarily provided by the school in order to develop those capabilities fully.
03 Assistive technology device means any item, piece of equipment, or product system, whether acquired commercially off the shelf, modified, or customized, that is used to increase, maintain, or improve functional capabilities of a child with a disability.

04 Assistive technology service means any service that directly assists a child with a disability in the selection, acquisition or use of an assistive technology device. The term includes the evaluation of the needs of a child with a disability, including a functional evaluation of the child in the child’s customary environment; purchasing, leasing, or otherwise providing for the acquisition of assistive technology devices by a child with a disability; selecting, designing, fitting, customizing, adapting, applying, retaining, repairing or replacing of assistive technology devices; coordinating and using other therapies, interventions, or services with assistive technology devices, such as those associated with existing education and rehabilitation plans and programs; training or technical assistance for a child with a disability, or if appropriate, that child’s family; and training or technical assistance for professionals (including individuals providing education or rehabilitation services), employers, or other individuals who provide services to, employ, or are otherwise substantially involved in the major life functions of the individual with a disability.

08 Children with disabilities shall mean those children who have been verified by a multidisciplinary evaluation team as per 92 NAC 51 006 as children with autism, behavior disorders, deaf blindness, hearing impairments, mental handicaps, multiple disabilities, orthopedic impairments, other health impairments, specific learning disabilities, speech language impairments, traumatic brain injury or visual impairments, who because of these impairments need special education and related services. The terms used in this definition are defined as follows:

08A Autism shall mean a developmental disability which significantly affects verbal and nonverbal communication and social interaction, generally evident before the age of three, that adversely affects educational performance. Other characteristics often associated with autism are engagement in repetitive activities and stereotyped movements, resistance to environmental change or change in daily routines, and unusual responses to sensory experiences. The term does not include children with characteristics of the disability category “behavioral disorder.”

08B Behavioral disorders shall mean:

08B1 A condition exhibiting one or more of the following characteristics over a long period of time and to a marked degree, which adversely affects the child’s educational performance or, in the case of children below age five, development;

08B1a An inability to learn which cannot be explained by intellectual, sensory, or health factors;
08B1b An inability to build or maintain satisfactory interpersonal relationships with peers and teachers;

08B1c Inappropriate types of behavior or feelings under normal circumstances;

08B1d A general pervasive mood of unhappiness or depression; or 08B1e A tendency to develop physical symptoms or fears associated with personal or school problems.

08B2 The term includes children with schizophrenia. The term does not include children with social maladjustments, unless it is determined that they have behavioral disorders. This term parallels the federal definition of seriously emotionally disturbed.

08C Deaf blindness shall mean concomitant hearing and visual impairments, the combination of which causes such severe communication and other developmental and educational problems that they cannot be accommodated in special education programs solely for children with deafness or blindness.

08D Hearing impairments shall mean a hearing impairment which is so severe that the child is impaired in processing linguistic information through hearing, with or without amplification, which adversely affects development or educational performance. Hearing impairments shall also mean a hearing impairment, whether permanent or fluctuating, which adversely affects a child’s development or educational performance. This term parallels the state and federal definitions of hearing impairments including deafness.

08E Mental handicap shall mean significantly subaverage general intellectual functioning existing concurrently with deficits in adaptive behavior and manifested during the developmental period, which adversely affects a child’s development or educational performance.

08F Multiple disabilities shall mean concomitant impairments (such as mental handicap visual impairment, mental handicap orthopedic impairment, etc., the combination of which causes such severe developmental or educational problems that they cannot be accommodated in special education programs solely for one of the impairments. The term does not include children with deaf blindness.

08G Orthopedic impairments shall mean a severe orthopedic impairment which adversely affects a child’s development or educational performance. The term includes impairments caused by congenital anomaly, impairments caused by disease, and impairments from other causes.

08H Other health impairments shall mean:

08H1 Having limited strength, vitality or alertness, due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes, which adversely affects a child’s development or educational performance.

08I Specific learning disability shall mean a disorder in one or more of the basic psychological processes involved in understanding or in using language, spoken or written, which may manifest itself in an imperfect ability to listen, think, speak, read, write, spell or to do mathematical calculations. The term includes such conditions as perceptual disabilities, brain injury, minimal brain dysfunction, dyslexia, and developmental aphasia. The term does not include children who have learning problems which are primarily the result of visual, hearing, or motor disabilities; of mental handicaps; of behavioral disorders; or of environmental, cultural, or economic disadvantage.
08J Speech language impairments shall mean a communication disorder such as stuttering, impaired articulation, a language impairment, or a voice impairment, which adversely affects a child’s development or educational performance.

08K Traumatic brain injury shall mean an injury to the brain caused by an external physical force resulting in total or partial functional disability or psychosocial impairment, or both, that adversely affects educational performance. The term includes open or closed head injuries resulting in impairments in one or more areas, including cognition; language; memory; attention; reasoning; abstract thinking; judgment; problem solving; sensory, perceptual and motor abilities; psychosocial behavior; physical functions; information processing; and speech. The term does not include brain injuries that are congenital or degenerative, or brain injuries induced by birth trauma.

08L Visual impairment shall mean a visual impairment which, even with correction, adversely affects a child’s development or educational performance. The term includes both partially seeing and blind.

45 Special education shall mean specially designed instruction, at no cost to the parent, to meet the unique needs of a child with a verified disability, including classroom instruction, instruction in physical education, home instruction and instruction in hospitals and institutions. The term includes speech pathology, occupational therapy and physical therapy if the service consists of specially designed instruction, at no cost to the parents, to meet the unique needs of a child with a disability.

46 Student assistance team (SAT) shall mean a group of persons utilizing problem solving and intervention strategies to assist the teacher(s) in the provision of general education.

Strategies for Diverse Learners–Appendix D
Resources–Foreign Language & Learning Disabilities

ARTICLES

A review of 30 years’ experience with French immersion second-language instruction concludes that most children with learning disabilities can benefit from a bilingual (immersion) approach—perhaps more than from traditional instruction.

The results of a factor analysis on a battery of native- and foreign-language aptitude tests given to 80 high school students in first-semester language classes identified 29 high- and 36 low-risk students, and 15 with learning disabilities. (68 references)

The multisensory structured language approach described here adheres to the direct and explicit teaching of phonology, serving as an alternative instructional strategy for dyslexic/learning-disabled or at-risk students. It is possible to adapt the approach to teach Spanish.

Following an historical overview of the foreign language learning difficulties of students with learning disabilities, the authors describe an assessment model for diagnosing learning problems. Discussion of the role of diagnosticians, counselors, and academic service providers touches on problem identification, accommodation, and course substitution or waiver.

A comparison of student attitudes suggests that learning disabled students’ language learning difficulties relate not to motivation or anxiety but rather to the students’ oral and written language problems.

Comparison of 15 successful and unsuccessful college foreign-language (FL) learners found significant intergroup differences in performance on the MLA aptitude test, tests of written and oral language in both syntactical and phonological domains, and math calculation. Results suggest that students with FL learning difficulties may have underlying language problems.

The field-tested instruction and assessment model described fosters development of second-language skills by integrating writing with listening, speaking, reading, and problem solving. The model draws upon elements of process-oriented instruction, whole language learning, cooperative learning, cognitive mapping, and reading and writing across the curriculum.

A review of 26 articles, which include information about college language learners, focuses on levels of intellectual functioning, reading and mathematics achievement, written language, and foreign language performance and also discusses needs and implications for providing service to the students.

Following a brief survey of changing rationales for the study of foreign languages (FL’s), the discussion lists major objections to teaching FL’s to learning disabled students before attempting to refute these objections using results of recent research.

Recent research has identified some of the problems facing capable, college-bound, learning-disabled students, whose disabilities are diverse and lacking any single, unifying profile. Adaptive cognitive strategies applicable to foreign language learning, together with the provision of academic options, make for flexibility in the direction that such students’ language learning may take.
