

Targeted Teaching Topic

Author: Jace Pittman
School: Gering High School

Summary of Topic:

Case Study

Main Curriculum Tie:

Inquiry.

Required Materials for Lesson:

- Computer with internet.
- Medical case study (not too challenging).

Background for Teacher:

Medical case studies are mini mysteries. Students can solve by using the internet and reasoning skills.

Student Prior Knowledge:

Subject of the case study knowledge is helpful but not required.

Intended Learning Outcome:

Improved internet research skills and critical reasoning ability.

Instructional Procedure:

- Find or make your own medical case study of an individual who went to a doctor.
- Have them use internet to find a logical diagnosis for this individual.
- Have students write out their conclusions and reasoning behind said conclusions.

How to Measure Outcome:

Are the conclusions correct? Is there solid reasoning behind these conclusions?
