

Targeted Teaching Topic

Author: Jennifer Judt
School: Norfolk High School

Summary of Topic:
Classroom Model of Heart
Main Curriculum Tie:
Cardiovascular system.
Required Materials for Lesson:
<ul style="list-style-type: none">• Masking tape (optional).
Background for Teacher:
Path of blood flow through the heart.
Student Prior Knowledge:
Path of blood flow through the heart.
Intended Learning Outcome:
Path of blood flow through the heart.
Instructional Procedure:
<ul style="list-style-type: none">• Designate boundaries of heart chambers (may use tape on the floor, arranging desks, or using students holding hands).• Students should then move through the chambers of the heart as blood cells.
How to Measure Outcome:
Watch students move through the heart model.

Classroom Model of Heart

Main Curriculum Tie:

Cardiovascular system.

Required Materials for Lesson:

- Masking tape (optional).

Background for Teacher:

Path of blood flow through the heart.

Student Prior Knowledge:

Path of blood flow through the heart.

Intended Learning Outcome:

Path of blood flow through the heart.

Instructional Procedure:

- Designate boundaries of heart chambers (may use tape on the floor, arranging desks, or using students holding hands).
- Students should then move through the chambers of the heart as blood cells.
