

Targeted Teaching Topic

Author: Heather Schmidt
School: Palmyra High School

| |
|--|
| Summary of Topic: Ethics |
| Main Curriculum Tie: Ethics. |
| Required Materials for Lesson: Paper slips (no smaller than business cards), pencils, and paper. |
| Background for Teacher: Need to be comfortable with facilitating ethics discussion and knowledge about some diseases. |
| Student Prior Knowledge: Have gone through genetic diseases/ disorders and understand some about the ethics associated. |
| Intended Learning Outcome: Think about issues that affect them and how they react to others. |
| Instructional Procedure: <ul style="list-style-type: none">• Hand out slips of paper. Tell students to label one side “A” and the other side “B”.• On side “A”, they should write 3 specific things they would look for in a perfect mate (personality, physical attributes, and possible disease immunity).• On side “B”, they should write 3 diseases that they don’t want their mate to have.• Collect papers, shuffle, and redistribute.• These are now the children they will have. They need to write what is on each side. Their children have all of the characteristics on both sides of the slip.• They need to write how they would handle the stress of hospital visits due to disease or disorder (1-2 paragraphs). |
| How to Measure Outcome: Participation and see that they put thought into their writings. |
