

Targeted Teaching Topic

Author: Sue Jurgens
School: Madison High School

Summary of Topic: Alternative Health Care
Main Curriculum Tie: Alternative health care.
Required Materials for Lesson: Laptops with internet connection.
Background for Teacher: Knowledge of chiropractor, homeopath, naturopath, hypnotist, hypnotherapy, meditation, biofeedback, acupuncture, acupressure, therapeutic touch, yoga, tai chi, and faith healing.
Student Prior Knowledge: Students each need laptop to quickly search on internet and find information of various alternative health care options.
Intended Learning Outcome: Students will discuss a variety of alternative health care options and each student is responsible for presenting information to others in the class.
Instructional Procedure: Each student will be assigned one of the alternative health care methods and report back to the class.
How to Measure Outcome: Active discussion with a possible written assignment after the reports have been given. One possible assignment would be for the students to write a reaction paper to what they learned from their own research and their classmate's research on the various topics.
