

Ready for Success

What Families Want to Know about
Starting School in Nebraska

NEBRASKA
DEPARTMENT OF
EDUCATION

Office of Early Childhood
2012

This booklet is in response to commonly asked questions from parents about preparing for, and entering kindergarten.

Some questions parents ask are about district policy. Nebraska has over 200 individual school districts, each having their own board, superintendent, and policies. The Nebraska Department of Education provides guidance and assistance to these districts. Understanding what is state law (such as the entrance age) and what is district policy (such as the early entry assessment procedure) can be confusing. Parents are encouraged to talk with school teachers and administrators for specific guidance.

Common Questions:

Page:

What does school readiness mean?	1
When can my child start kindergarten?	1
What if my child doesn't meet the cutoff date?	2
How do I know if my child is ready?	2
What will kindergarten be like?	4
Should my child start now or next year?	5
How can I help my child be ready?	6
How can I prepare for the first day?	7
How can I support my child's education?	9

Resources:

Books about school to read with your child	10
Links for websites, mobile apps, and videos to support school readiness	11

What does school readiness mean?

Children are born ready and eager to learn. The goal of school readiness efforts is to support ALL children entering kindergarten with the skills, knowledge, health, and attitude to be successful life-long learners. Ready children have families who support their children's learning, and schools that are prepared to meet the individual needs of ALL children the year they are age-eligible to attend kindergarten.

When can my child start kindergarten?

Nebraska law entitles children to receive free public education the year that they turn five on or before July 31. This is called a "cutoff date." Schools cannot test age-eligible children for kindergarten entrance, nor suggest delaying entrance. It is the responsibility of schools to be ready to meet the individual needs of every age-eligible child, regardless of their abilities.

What if my child doesn't meet the cutoff date?

School districts are allowed to enroll a child who misses the cutoff date, but turns five between August 1 and October 15. Parents who are interested in enrolling their child early should contact their school as soon as possible to ask about the procedure for early entry assessment.

How do I know if my child is ready?

Perhaps this is the most frequently asked question and the one that is the most difficult to answer. There are many opinions and much research about what it means to be ready.

School readiness is about more than what your child knows. Kindergarten teachers say ready children are:

- healthy, rested, and well fed
- able to pay attention, follow directions and communicate their thoughts and needs without being disruptive
- curious and enthusiastic about new activities
- confident, cooperative and able to practice age-appropriate self control.

Children enter kindergarten with a wide variety of skills and knowledge. There is not just one thing, nor a list of skills, that makes a child ready for school. In fact, you should consider all areas of your child’s development, not just her/his academic skills. See the resources section at the end of this booklet for ideas on how you can support your child’s school readiness.

In Nebraska, the only requirement for kindergarten entrance is age-eligibility: your child turns five on or before July 31. Therefore, it is not a question of whether your age-eligible child is ready for kindergarten. Rather, it is a question of how can you support your child’s transition to school, which includes helping the school be ready for your child.

What will kindergarten be like?

Kindergarten is for ALL five-year-olds. It is normal for children to be at different levels of development, with a wide range of abilities. Kindergartners quickly gain skills and knowledge and often catch up with each other by the end of the year.

Nebraska teachers plan their curriculum based on state standards, which are what children should know and be able to do by the **end** of the school year in: language arts (reading, writing, and communicating), mathematics, science, and social studies.

Recognizing that young children are active learners and learn best through play, many kindergarten teachers provide plenty of time for play and exploration. However, kindergarten programs have come under pressure to become more structured and academic. This may cause some parents to be concerned about their child's ability to be successful.

Because each classroom may have different expectations and daily schedules, it is important that parents talk to the teacher or principal if you are unsure about your child's ability to be successful.

Should my child start now or next year?

Once you know the expectations of your child's kindergarten, you may wonder if your child would benefit from waiting another year to start. This practice, called "red-shirting," is a decision based on the individual abilities and needs of your child and family.

If you are considering delaying kindergarten entrance, there are many things to consider:

- **Research shows that when red-shirted children** start school, they may have more knowledge and skills than their peers, but by the end of kindergarten, and certainly by third grade, most children catch up to each other.
- **When children are red-shirted, some may regress** and act out because they are bored and their developmental needs aren't being met.
- **What options are available in your community** if your child will not be in kindergarten? Which option will best help your child develop the skills that you are concerned about?
- **Public preschool is typically no longer an option** once your child is eligible for kindergarten.
- **State law requires that children begin school** the year they turn six (known as "compulsory age").

***"Did I make the right choice?
I don't know, but I made the best decision
for my family that I could have at the time.
As a parent, that's the best I can do."***

How can I help my child be ready?

High quality early care and education programs provide children with opportunities to develop the skills related to school success through play. But there are many things parents can do to help children be successful in school and in life. You can:

Promote **good healthy habits** by making sure your child:

- Follows a routine which includes a balanced diet and plenty of activity and rest

Encourage **social and emotional well-being** by giving your child chances to:

- Take care of own needs, such as dressing & toileting
- Play with others, learning to share and cooperate
- Express emotions in safe ways, learning to control his/her own behaviors and reactions
- Pay attention, make choices, follow directions & rules

Support **language and learning** by giving your child chances to:

- Be read to every day & talk about words you see
- Practice drawing, writing, and recognizing numbers, shapes, colors, letters, sounds and her/his name
- Work on a task until it's done, with support as needed
- Play! Children learn best when they're having fun, so use games, toys, natural events and routines to teach, rather than using flashcards and worksheets.

How can I prepare for the first day?

Starting kindergarten is a time of change for both your child and your family. It is common for parents and children to feel nervous about the new routines and expectations. The more you know, the better prepared you and your child will feel.

To help your child, you can:

- **Be enthusiastic and positive** when you talk with your child about the changes. If you are excited and confident, your child will be, too.
- **Make an appointment** with your doctor or clinic for the kindergarten check-up.
- **Contact the school** you want your child to attend:
 - ✓ Ask how and when to enroll. You will need your child's original birth certificate.
 - ✓ Request information about school expectations, rules, and classroom daily routines.
 - ✓ Ask about start and release times, which may vary between schools.
 - ✓ If you will need before or after school care or transportation, be sure to ask what options are available from the school or in your community.

- **Talk with your childcare provider** about adjusting your current routine (such as naptime) to help prepare your child for the new daily schedule.

- **Read books about kindergarten** and encourage your child to talk about his/her feelings.

- **Participate in school open houses** and information meetings. Help your child feel more comfortable and confident by knowing what will happen, where things are, whom she knows, and what to look forward to.
- **Meet with your child's teacher**, especially if you feel your child may need individual attention or support.
- **Start a new bed time and morning routine** a few days before school starts. A routine will help your child get the 10-12 hours of sleep needed.
- **Talk with your child** about what you will each do on that first day. Consider sending a small visual reminder, such as a family photo to provide comfort.
- **Arrive at school early** to give your child time to settle in. Remind your child about your plans for the end of the school day. Give a reassuring, cheerful, and short good-bye.

How can I support my child's education?

Now that you have a new school routine, keep it up! With all the changes happening, your child will welcome a regular bedtime and morning routine.

Having a successful entry into kindergarten helps children have a positive attitude about school and learning. As your child's partner in education, it is important for you to get, and stay, involved.

- **Be enthusiastic about school.** Focus on the positives. When you show that school is important to you, your child will learn that, too.
- **Help your child be at school, on time, every day.** Whenever possible, make your child's appointments for after school or towards the end of the school day.
- **Keep reading to, and with, your child daily.** This can be a special time in your bedtime routine to see how much your child is learning.
- **Ask about your child's day** and about the work he brings home, too.
- **Talk to your child's teacher often and early,** especially if you have concerns. The relationships and communication between the teacher and your family is key to ensuring your child's success.
