

## Targeted Teaching Topic

**Author:** Krista Holliday  
**School:** Ewing Public Schools

**Summary of Topic:**

Hey, They're NOT Doctors!

**Main Curriculum Tie:**

A research opportunity to find out how other disciplines are connected to medicine. Career exploration, team work, academic foundation, and systems.

**Required Materials for Lesson:**

A list of careers that are not "typical" medical careers. Examples: business, sanitation, janitorial, art, public relations, finance, electrical engineer, mechanical engineer, computer technology, etc.

**Background for Teacher:**

Knowledge of how other careers are associated with medicine and an understanding how they all work together.

**Student Prior Knowledge:****Intended Learning Outcome:**

To learn that there are many other careers and discipline associated with health careers.

**Instructional Procedure:**

Students choose a discipline and then find out and document (with source) how the career is related to health care and how the health care system depends on these disciplines.

**How to Measure Outcome:**

Rubric. Students present their findings to the class and then discuss their importance.
