MISSION

Enriching lives by protecting, restoring and utilizing Nebraska's tree and forest resources.

PROGRAMS

The Nebraska Forest Service is the state sponsoring agency for both Project Learning Tree and Project WET (Water Education for Teachers). Utilizing these high-quality conservation education programs, the NFS offers professional development on the multiple curricula offered for PreK-12 for both formal and non-formal educators as well as environmental education best practices. We can work with programs on a program-by-program basis to determine the best fit of curriculum for the program. We also connect programs with foresters throughout the state who can lead activities and speak on a variety of forestry topics.

Nebraska Statewide Arboretum

WEBSITE

<https://plantnebraska.org/>

MISSION

We plant Nebraska for healthy people, vibrant communities and a resilient environment.

PROGRAMS

Nebraska Statewide Arboretum has a wealth of native and recommended plant recommendations, landscape resources and grant opportunities for home, school and other public landscapes, plus workshops, tours and outreach. Attract pollinators with Bloom Box for your school at <https://plantnebraska.org/plants/bloom-box/bloom-box/bloom-box-school-profile.html>.
