Introduction

Health literacy is the ability to access, understand, appraise, apply and advocate for health information and services in order to maintain or enhance one's own health and the health of others (SHAPE America). Comprehensive skills-based Health Education is a planned sequential standards based curriculum presented by qualified professionals to promote the development of health knowledge, health related skills, and positive attitudes toward health and wellbeing for students preschool through grade 12. The comprehensive health education program motivates students to maintain and improve their health; advocate for self and others; prevent disease; form healthy relationships; and avoid or reduce health-related risk behaviors. The Nebraska Health Education Standards identify the following 8 content strands for skill development for students in Kindergarten through grade 12: foundations of personal health; nutrition & physical activity promotion; substance abuse prevention; disease prevention; injury prevention & safety; social, emotional & mental health; human growth & development; and consumer & environmental health.

Content Area Standards Overview

The Nebraska Health Education Standards guide the knowledge and skills that students should learn, practice and demonstrate, but they do not prescribe particular curriculum, lessons, teaching techniques, or activities. These standards create a framework for teaching, learning and assessment, and they articulate a trajectory for knowledge and skill acquisition across all grade levels. This ensures that student learning builds on prior knowledge and skills and becomes more in-depth over time. Standards describe what students are expected to know and be able to do, while locally defined curriculum and instructional materials are used to help students master the standards. The Nebraska Department of Education does not mandate the curriculum or instructional materials used within a local school.

Organization and Structure of Health Education Standards

The overall structure of Nebraska's Health Education Standards reflects the two-tier structure common across all Nebraska content area standards. The two levels include standards and indicators. Standards include broad, overarching content-based statements that describe the basic cognitive, affective, or psychomotor expectations of student learning. The standards, across all grade levels, reflect long-term goals for learning. Indicators further describe what students must know and be able to do to meet the standard and provide guidance related to classroom instruction. In addition to standards and indicators, the Nebraska Health Education Standards provide examples. The "e.g...." statements provide guidance relative to topics that may be included in the locally determined curriculum. These suggestions may be used to meet equitable learning expectations of the standards and indicators.

The Nebraska Health Education Standards are organized by grade level for grades K-8 and course-based for high school. The K-8 standards and indicators are organized within eight strands, which are essential components for health literacy.

The eight content strands are described below:

- Foundations of Personal Health: Foundations of Personal Health will assist students with acquiring basic health concepts and functional health knowledge and skills providing a foundation for promoting health-enhancing behaviors. This strand includes essential concepts that are based on established health behavior theories and models. These concepts focus on both health promotion and risk reduction. Through the development of the foundational skills and knowledge (e.g. communication skills, resiliency skills, protective factors, goal setting, decision making), the subsequent content strands will build upon and further cultivate these skills for student health literacy.
- Nutrition & Physical Activity Promotion: The nutrition and physical activity strand promotes healthy lifestyle choices through knowledge and skills development to properly fuel the body. Students will learn the importance of movement and dietary choices along with their effects on the body, academics and overall health. The link between nutrition and physical activity and learning is well documented. Healthy eating patterns and physical activity are essential for students to achieve their full academic potential, full physical and mental growth, and lifelong health and well-being. Proper nutrition and adequate physical activity significantly reduce risk factors for obesity and other chronic diseases, such as type 2 diabetes, heart disease, stroke, certain cancers, and depression (CDC).
- Substance Abuse Prevention: The substance abuse prevention strand provides students with knowledge and skills to make healthy choices to avoid or reduce their risk of substance abuse (e.g. alcohol, tobacco, nicotine-delivery devices, and other drugs both legal and illegal). Students will learn the difference between harmful and helpful drugs and medication along with short and long term consequences of use, misuse, and abuse on overall health. Substance abuse and misuse potentially has the ability to negatively impact every aspect of an individual's life at home, school or community.
- **Disease Prevention:** The disease prevention strand promotes hygiene and safety practices to prevent and reduce the risk of diseases and conditions. By understanding what a disease is and how they are transmitted and acquired, students will learn and adopt behaviors which will maintain and enhance their overall health. Six in ten Americans live with at least one chronic disease, like heart disease and stroke, cancer, or diabetes. These and other chronic diseases are the leading causes of death and disability in America, and they are also a leading driver of healthcare costs (CDC, 2020).
- Injury Prevention & Safety: The injury prevention and safety strand will assist students in understanding their role in protecting themselves and others from unintentional danger, risk, or injury. Additionally, students will develop skills to recognize and appropriately respond to injuries or emergency situations. In the United States, Injuries are the leading cause of death in children ages 19 and younger. Injuries affect everyone—regardless of age, race, or economic status (CDC, 2020).
- Social, Emotional & Mental Health: The social, emotional, and mental health strand will help students understand diverse cultural experiences that impact mental, emotional, and social health. Students will learn strategies to help

manage their thoughts, feelings, emotions, and behaviors. Learning how to cope with change and stressors and recognize when support is needed for self or others is a key component of this strand. Students will develop positive social behaviors that provide them with the skills to get along with and assist others. Social, emotional, and mental wellness are key elements to one's overall health and well-being. Understanding individual abilities to manage emotions can assist in coping with the typical stresses of life, increasing productivity, building stronger relationships and lead to happier, healthier more fulfilling lives.

- Human Growth & Development: The human growth & development strand teaches students the structures and functions of the body systems and how to recognize and manage the physical and psychological changes that occur during development and maturation experienced throughout the lifespan. Students will recognize characteristics relating to identity, sexuality and healthy relationships and identify the fundamental components of sexual health. It is recommended that comprehensive human growth and development education begins in kindergarten and occurs sequentially for all students grades K-12. Human growth and development programs that are developmentally, culturally, age appropriate, medically accurate, and unbiased have been proven to prevent or reduce risky behaviors.
- Consumer & Environmental Health: The consumer & environmental health strand will teach students how to identify and access valid consumer products, services and resources for a healthy lifestyle and recognize how the environment plays a major factor in one's overall well-being. Students will develop an understanding and health enhancing behaviors for community engagement and utilizing supports within their community. School-based consumer health education is necessary to prepare current and future consumers to safely and efficiently advocate for oneself and utilize the medical marketplace (i.e. consumer products, services, and resources) to ensure a healthy lifestyle. Maintaining a healthy environment is central to increasing quality of life and years of healthy life. Therefore, environmental health must address the societal and environmental factors that increase the likelihood of exposure and disease (Healthy People 2020).

In addition to a common structure for content area standards, a consistent numbering system is used. The Health Education standards numbering system is as follows:

- The first set of letters represent the content area, Health Education.
- The second letter(s) or number represents the grade level.

- The third is a number, for K-8 it represents the content strand and for high school it represents the course name.
- The fourth is a number to represent the standard within the strand or course.
- Last, is a letter representing the indicator for that standard.

	HE.7.2.2.f: Explain the relationship between self-expression and lifelong enjoyment through physical activity.
	HE.7.2.2.g: Design a warm-up/cool-down regimen using dynamic and static stretches for a self-selected physical activity.
HE.7.2.3.	Students will recognize the effects of nutritional and physical activity
	choices on overall health.
	HE.7.2.3.a: Compare and contrast how food choices can affect physical activity
	and performance.
	HE.7.2.3.b: Identify how to balance caloric intake and expenditure.
	HE.7.2.3.c: Compare and contrast physical activity levels and the effects on
	nutritional needs.
	HE.7.2.3.d: Define disordered eating and eating disorders.
	ubstance Abuse Prevention
HE.7.3.1.	Students will understand the differences between harmful and helpful use
	of drugs and medication.
	HE.7.3.1.a: Describe the possible progression of substance use, misuse, and abuse
	and the potential risks associated with each.
	HE.7.3.1.b: Categorize different substances and their effects on overall health (e.g. opioids, cannabinoids, alcohol, amphetamines, steroids).
	HE.7.3.1.c: Examine the safe use and potential risks of prescription medications,
	over-the-counter (OTC) medications and herbal or dietary supplements.
HE.7.3.2.	Students will recognize positive and negative influences and effects of
	substance use, misuse and abuse.
	HE.7.3.2.a: Distinguish between the potential short-term and long-term effects of
	substance use.
	HE.7.3.2.b: Apply strategies to resist substance use that can lead to misuse and
	abuse.
	HE.7.3.2.c: Examine the reasons why people choose to use or not to use alcohol, tobacco and other drugs.
	HE.7.3.2.d: Define addiction and understand the need for professional
	intervention.
	HE.7.8.3.2.e: Analyze influences on personal choices to use or not use tobacco,
	alcohol and other drugs.
HE.7.3.3.	Students will identify short and long term consequences of substance use,
	misuse and abuse in relation to the health triangle.
	HE.7.3.3.a: Summarize the negative consequences of using alcohol, tobacco and
	other drugs.
	HE.7.3.3.b: Compare and contrast potential short and long term consequences of substance use on all dimensions of health (including side effects).
	HE.7.3.3.c: Assess the validity of information as it applies to substance use, misuse,
	and abuse.
	HE.6.3.3.d: Evaluate how the use of substances can cause illness, injury and
	complications with growth and development.
	HE.7.3.3.e: Describe the health risks of using performance-enhancing drugs.
	HE.7.3.3.f: Encourage others to be tobacco-, alcohol- and drug-free.
HE.7.4. D	isease Prevention
HE.7.4.1.	Students will understand the differences between harmful and helpful use
	of drugs and medication.

HE.7.4.1.a: Differentiate between communicable (infectious) and non-communicable (non-infectious) diseases (e.g. STDs, STIs, HIV, influenza, heart disease, cancer, diabetes). HE.7.4.1.b: Identify blood borne pathogens, such as those causing HIV and Hepatitis B and C, and methods to prevent disease transmission. HE.7.4.1.c: Explain the behavioral and environmental factors that contribute to some common chronic diseases. HE.7.4.2. Students will identify ways to protect from and reduce the risk of diseases and conditions. HE.7.4.2.a: Associate how risk factors and health behaviors work together to reduce and/or prevent diseases and conditions. HE.7.4.2.b: Summarize health behaviors to prevent the spread of infectious (communicable) diseases that are transmitted by food, air, indirect contact, and person-to-person contact. HE.7.4.2.c: Set a personal goal and monitor progress to prevent or reduce one's risk of disease transmission. HE.7.4.2.d: Describe the relationship between disease prevention and quality of life. HE.7.5.1. Students will recognize and respond to an injury or emergency situation. HE.7.5.1.a: Describe situations that could lead to unsafe risks that cause injuries. HE.7.5.1.b: Explain climate-related physical conditions that affect personal safety, such as heat exhaustion, sunburn, heat stroke, and hypothermia. HE.HS.1. Foundations of Health Education

Foundations of Health education is designed to help students learn how their bodies function, what affects their bodies and how to make positive choices related to their health. The health curriculum is comprehensive and progressive, promoting understanding of health-related knowledge and responsibility for decisions that affect one's health. The course focuses on risk reduction and healthy protective factors and health promotion through identifying risk behaviors to your personal health including dietary habits, tobacco and vaping use, alcohol and drug use, physical inactivity, intentional and unintentional injuries as well as risky sexual behavior. Through identifying these risk factors, the course aims to develop an understanding of how you can utilize skills and knowledge to promote your overall personal health.

	acquired.
	HE.HS.1.10.a: Compare and contrast the signs, symptoms, and risk factors of
	infectious (communicable) diseases.

	HE.HS.1.10.b: Analyze how genetics and family diseases can impact your personal health.
	HE.HS.1.10.c: Compare and contrast different types of pathogens and explain
	how they are different.
	HE.HS.1.10.d: Assess how the body defends itself against pathogens and
	disease.
	HE.HS.1.10.e: Analyze treatment options for bacterial, viral, fungal and parasitic infections.
	HE.HS.1.10.f: Analyze how Sexually Transmitted Infections spread and affect the body.
	HE.HS.1.10.g: Examine the causes and progression of non-communicable (non-
	infectious) diseases and their treatment.
HE.HS.1.11.	Students will identify ways to protect from and reduce the risk of diseases
	and conditions.
	HE.HS.1.11.a: Hypothesize how lifestyle choices can impact chronic disease.
	HE.HS.1.11.b: Analyze the influences that impact your personal health with
	regard to disease prevention.
	HE.HS.1.11.c: Analyze the different ways that communicable (infectious)
	diseases spread to others (Methods of Transmission).
	HE.HS.1.11.d: Connect the various stages of infection and how they correlate
	with immune response.
	HE.HS.1.11.e: Evaluate personal habits that promote resistance to infection. (e.g.
	sleep patterns, nutrition, exercise).
	HE.HS.1.11.f: Practice respiratory etiquette and best practices for hand washing.
	HE.HS.1.11.g: Practice skills for sexual risk reduction and avoidance.
	HE.HS.1.11.h: Analyze the effectiveness of prophylaxis for prevention of Sexually Transmitted Infections.
	HE.HS.1.11.i: Identify and compile resources for testing and treatment of Sexually
	Transmitted Infections and Sexually Transmitted Diseases.
HE.HS.1.12.	Students will recognize and respond to an injury or emergency situation.
	HE.HS.1.12.a: Analyze the signs and symptoms of various injuries, illnesses, and emergencies to be able to respond accordingly.
	HE.HS.1.12.b: Speculate and deduce the appropriate health service required in
	injury or emergency situations for oneself or others.
	HE.HS.1.12.c: Demonstrate the proper emergency care and lifesaving
	procedures using universal precautions in various injuries and emergencies such
	as CPR and AED, first aid, and control of bleeding.
	HE.HS.1.12.d: Interpret when a natural disaster is occurring and how to respond
	for personal safety. HE.HS.1.12.e: Locate reliable community resources and/or other sources of
	support for someone who is being sexually harassed, abused, assaulted,
	exploited or trafficked.
HE.HS.1.13.	Student will understand and learn specific behaviors that promote injury
	prevention and personal safety.
