

### Mission Statement

Provide parents educational resources to become strong advocates of their children's education and leaders in their community.

### What is State PAC?

The State Parent Advisory Council (PAC) is a group of parents, program staff, and community partners that make recommendations about the planning, operation, and evaluation of the program.

Parent input helps improve:

- planning of the services offered to migratory children,
- the evaluation of the program,
- parent involvement, and
- the development of the Nebraska Migrant State Plan.

Attend educational opportunities via your computer, tablet or smartphone or by accessing technology at your local project. **Let's learn and grow together!**
