

STEM FAMILY ENGAGEMENT GRANTS

Beyond School Bell's family engagement mini-grants are built around a STEM-based family engagement planning tool and workbook that wrap evidence-based best practices around STEM programming and outreach.

Using STEM as a family engagement platform provides opportunities to **connect** to your students' **families** with fun, hands on, productive activities.

This approach connects **students** and **STEM career pathways** by empowering families to support their kids in ways they may not otherwise have felt equipped to do.

APPLY NOW!

Use the QR code below to access applications!

We offer three tiers of family engagement grants for the school year and one tier for summer. The grants have been designed to meet your program where it is based on your capacity and your site's current family engagement practices.

Different grant tiers offer a variety of opportunities, for example...

Tier 1 offers funds for:

- Professional development and team building for your staff around STEM-based family engagement

Tier 3 offers funds for:

- Professional development and team building for your staff around STEM-based family engagement
- Building/Strengthening communications with families
- Family engagement events with STEM activities
- A set of Take-Home STEM Backpacks families can check out from your program

For more information or questions about which grant is right for your program:
