

**ISIP Reading Kindergarten – Grade 8 Composite Score
Threshold Levels 2023-2024**

The objective of ISIP™ Lectura is to identify students potentially at risk of reading failure. The student's overall reading ability index is used as the dividing line to determine students potentially at risk. Skill goals and criteria become progressively more difficult with each assessment period.

Students scoring at or above the cut-point (below) are on track to meet grade level expectations. Students scoring below the cut-point are at some degree of risk for not meeting grade level expectations and should receive strategic instructional support. For students, well below the cut-point, intensive intervention is recommended in order to meet future reading goals.
