

NebraskaREADS
MAP Suite
2023-24

To meet the criteria set forth by the Nebraska Department of Education, it is recommended that MAP Growth Reading and MAP Reading Fluency are paired. Based on the strength of last spring’s [NWEA's Linking Study Between NSCAS and MAP Growth](#) and additional analysis, NSCAS Growth’s RIT scores can be used for 3rd grade students using the same thresholds as the MAP Growth.

MAP Reading Fluency offers several threshold levels to inform educators which students would benefit from additional resources and intervention. The first and most reliable threshold is any student with a “Flagged” screener outcome status which indicates a student may be at risk for future reading difficulty. Any student with a “Flagged” status is considered Below Threshold. Students who are “Flagged” on screener outcome and demonstrate low performance in any foundational skill domain percentile or WCPM (Scaled) are considered Well Below Threshold. Well Below Threshold identifies the students with the greatest need and additional intensive intervention may be warranted.

Assessment Title	Grade Level	Threshold Definition	Threshold Level		
			Fall Score	Winter Score	Spring Score
MAP Reading Fluency: Fall/Winter/Spring – Foundational Skills	K	Below Threshold	Flagged screener outcome	Flagged screener outcome	Flagged screener outcome
		Well Below Threshold	Flagged screener outcome and 10th percentile or below in any one or more Foundational Skills domain	Flagged screener outcome and 10th percentile or below in any one or more Foundational Skills domain	Flagged screener outcome and 10th percentile or below in any one or more Foundational Skills domain
MAP Reading Fluency: Fall/Winter: Foundational Skills Spring: Adaptive Oral Reading	1	Below Threshold	Flagged screener outcome	Flagged screener outcome	<u>Foundational Skill path:</u> Flagged screener outcome <u>Oral Reading path:</u> Flagged screener outcome
		Well Below Threshold	Flagged screener outcome and 10th percentile or below in any	Flagged screener outcome and 10th percentile or below in any	<u>Foundational Skill path:</u> Flagged screener outcome and

			one or more Foundational Skills domain	one or more Foundational Skills domain	10 th percentile or below in any one or more Foundational Skills domain or <u>Oral Reading path:</u> Flagged screener outcome and WCPM (Scaled) of 20 or below
**MAP Reading Fluency: Fall: Foundational Skills Winter/Spring: Adaptive Oral Reading	2	Below Threshold	<u>Foundational Skill path:</u> Flagged screener outcome <u>Oral Reading path:</u> Flagged screener outcome	<u>Oral Reading path:</u> Flagged screener outcome	<u>Oral Reading path:</u> Flagged screener outcome
**MAP Reading Fluency: Fall: Foundational Skills Winter/Spring: Adaptive Oral Reading		Well Below Threshold	<u>Foundational Skill path:</u> Flagged screener outcome and 10 th percentile or below in any one or more Foundational Skills domain or <u>Oral Reading path:</u> Flagged screener outcome and WCPM (Scaled) of 22 or below	<u>Oral Reading path:</u> Flagged screener outcome and WCPM (Scaled) of 34 or below	<u>Oral Reading path:</u> Flagged screener outcome and WCPM (Scaled) of 42 or below
MAP Growth K-2	K		RIT Score 130	RIT Score 140	RIT Score 147
MAP Growth K-2	1		RIT Score 149	RIT Score 159	RIT Score 164
MAP Growth 2-5	2		RIT Score 164	RIT Score 173	RIT Score 177
MAP Growth 2-5	3		RIT Score 178	RIT Score 185	RIT Score 189
NSCAS Growth	3		RIT Score 178	RIT Score 185	RIT Score 189

WCPM (Scaled) = Words Correct per Minute Scaled

Screener Outcome and Percentile data are found on the Screener Outcome report in MAP Reading Fluency

Additional MAP Suite guidance for NebraskaREADS

- Kinder and 1st grade through middle of the year can begin with Foundational Skills or Dyslexia Screener. At the end of year for 1st grade, students can be transitioned to Adaptive Oral Reading.
- For 1st grade students whose performance in sentence reading fluency indicates readiness for passage reading, those students can be assigned a passages-only test form as well to gather fluency data
- If students are still flagged in MAP Reading Fluency as of Spring 1st grade, it may be most appropriate for those students to continue to be tested in MAP Reading Fluency during 2nd grade (at least fall)
- **2nd grade beginning of year, students can begin with Adaptive Oral Reading. From the middle of 2nd grade forward, most students can be transitioned to Adaptive Oral Reading – Passages Only.
- Dyslexia screener test form can be used in place of the foundational skills benchmark should the district also want to have RAN data. There is no need to test a student in both during the same term.
- Especially for 2nd and 3rd grade students falling below the MAP Growth/NSCAS Growth threshold, use MAP Reading Fluency to gather additional data to inform reading plans. MAP Reading Fluency's progress monitoring assessment forms can be used as part of a reading plan to track student progress in foundational skills and oral reading.
