

Nebraska Two-Year Opportunity Grants

April 8, 2022 through June 30, 2024

GRANTEE

Nebraska Farm Bureau Foundation

OVERVIEW

Walk to Unlock Nebraska invites students and teachers to combine exercise and learning through a fun, competitive virtual platform that rewards physical activity with fascinating historical, geographical, and agriculture information about our state.

The program provides checkpoints along routes across the state for youth (and their teachers!) to virtually visit while tracking physical activity time, steps and/or miles. Walk to Unlock Nebraska was created with the idea of combining academic enrichment and physical activity:

- This learning experience is targeted for students in kindergarten through eighth grade.
- Multiple lesson topics include science, social studies, math, language arts, nutrition and more.
- Integrated curricular ideas are included to be used as tools for learning both in the classroom and at home.
- Virtual field trips are available to enhance the journey.
