## Grade 4

| 4.N | NUMBER: Students will solve problems and reason with number concepts using multiple representations, make connections within math and across disciplines, and communicate their ideas. | $\begin{aligned} & \text { NUMBER } \\ & 35-45 \% \end{aligned}$ |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 4.N. 1 | Numeric Relationships: Students will demonstrate and represent multi-digit numbers using relationships with the base-ten number system. | DOK 1 | DOK 2 | DOK 3 |
| 4.N.1.a | Read, write, and demonstrate multiple equivalent representations for whole numbers up to 1,000,000 and decimals to the hundredths using visual representations, standard form, and expanded form. | x | x |  |
| 4.N.1.b | Represent and justify comparisons of whole numbers up to $1,000,000$ and decimals through the hundredths place using number lines and reasoning strategies. | x | x |  |
| 4.N.1.c | Recognize a digit in one place represents ten times what it represents in the place to its right. | Assessed at the local level |  |  |
| 4.N.1.d | Use decimal notation for fractions with denominators of 10 or 100 . (e.g. $43 / 100=0.43$ ) | x | x |  |
| 4.N. 2 | Fractions and Decimals: Students will extend understanding of fractions by equivalence and ordering and will develop an understanding of decimals. | DOK 1 | DOK 2 | DOK 3 |
| 4.N.2.a | Explain and demonstrate how a mixed number is equivalent to a fraction greater than one and how a fraction greater than one is equivalent to a mixed number using visual fraction models and reasoning strategies. | Assessed at the local level |  |  |
| 4.N.2.b | Explain and demonstrate how equivalent fractions are generated by multiplying by a fraction equivalent to 1 using visual fraction models and the Identify Property of Multiplication. | Assessed at the local level |  |  |
| 4.N.2.c | Compare and order fractions having unlike numerators or denominators using number lines, benchmarks, reasoning strategies, and/or equivalence. | x | x | x |
| 4.N. 3 | Operations with Fractions: Students will understand and demonstrate fractional computation. | DOK 1 | DOK 2 | DOK 3 |
| 4.N.3.a | Decompose a fraction into a sum of fractions with the same denominator in more than one way and record each decomposition with an equation and a visual representation. | Assessed at the local level |  |  |
| 4.N.3.b | Explain the meaning of addition and subtraction of fractions with like denominators using visual fraction models, properties of operations, and reasoning strategies. | Assessed at the local level |  |  |
| 4.N.3.c | Add and subtract fractions and mixed numbers with like denominators. | x | x |  |
| 4.N.3.d | Solve authentic problems involving addition and subtraction of fractions and mixed numbers with like denominators. | x | x | x |
| 4.N.3.e | Multiply a fraction by a whole number using visual fraction models and properties of operations. | x | x |  |

| 4.N.4 | Factors and Multiples: Students will find factors and <br> multiples and classify numbers as prime or composite. | DOK 1 | DOK 2 | DOK $\mathbf{3}$ |
| :--- | :--- | :---: | :---: | :---: |
| 4.N.4.a | Determine whether a given whole number up to 100 is a <br> multiple of a given one-digit number. | x | x |  |
| 4.N.4.b | Determine factors of any whole number up to 100 and <br> classify a number up to 100 as prime or composite. | x | x |  |

| 4.A | ALGEBRA: Students will solve problems and reason with algebra using multiple representations, make connections within math and across disciplines, and communicate their ideas. | ALGEBRA20-30\% |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 4.A. 1 | Operations and Algebraic Thinking: Students will extend understanding of multiplication and division and apply operational properties to solve problems involving variables. | DOK 1 | DOK 2 | DOK 3 |
| 4.A.1.a | Add and subtract multi-digit numbers using an algorithm. | Assessed at the local level |  |  |
| 4.A.1.b | Multiply up to a four-digit whole number by a one-digit whole number and multiply a two-digit whole number by a two-digit whole number, using strategies based on place value, properties of operations, and algorithms. | x | x |  |
| 4.A.1.c | Divide up to a four-digit whole number by a one-digit divisor with and without a remainder using strategies based on place value. | x | x |  |
| 4.A.1.d | Determine the reasonableness of whole number products and quotients using estimations and number sense. | Assessed at the local level |  |  |
| 4.A.1.e | Create a simple algebraic expression or equation using a variable for an unknown number to represent an authentic mathematical situation (e.g., $3+n=15,81 \div n=9$ ). |  | x |  |
| 4.A.1.f | Solve one- and two-step authentic problems using the four operations including interpreting remainders and the use of a letter to represent the unknown quantity. | x | x | x |

| 4.G | GEOMETRY: Students will solve problems and reason with geometry using multiple representations, make connections within math and across disciplines, and communicate their ideas. | $\begin{aligned} & \text { GEOMETRY } \\ & 15-25 \% \end{aligned}$ |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 4.G. 1 | Shapes and Their Attributes: Students will draw and identify lines and angles, and classify shapes by properties of their lines and angles. | DOK 1 | DOK 2 | DOK 3 |
| 4.G.1.a | Identify, create, and describe points, lines, line segments, rays, angles, parallel lines, perpendicular lines, and intersecting lines. | x | x |  |
| 4.G.1.b | Justify the classification of angles as acute, obtuse, or right. |  | X | x |
| 4.G.1.c | Justify the classification of two-dimensional shapes based on the presence or absence of parallel and perpendicular lines, or the presence or absence of specific angles. |  | x | x |
| 4.G.1.d | Recognize, draw, and justify lines of symmetry in twodimensional shapes. | x | x | x |
| 4.G. 2 | Measurement: Students will generate simple conversions from a larger unit to a smaller unit to solve authentic problems and measure angles. | DOK 1 | DOK 2 | DOK 3 |
| 4.G.2.a | Identify and use the appropriate tools, operations, and units of measurement, both customary and metric, to solve authentic problems involving time, length, weight, mass, and capacity. | Assessed at the local level |  |  |
| 4.G.2.b | Determine the reasonableness of measurements involving time, length, weight, mass, capacity, and angles. | X | X |  |
| 4.G.2.c | Generate simple conversions from a larger unit to a smaller unit within the customary and metric systems of measurement. |  | x |  |
| 4.G.2.d | Measure angles in whole number degrees using a protractor and relate benchmark angle measurements to their rotation through a circle (e.g., $180^{\circ}=1 / 2$ of a circle). | X | X |  |
| 4.G.2.e | Recognize angle measures as additive and solve problems involving addition and subtraction to find unknown angles on a diagram. | X | X |  |
| 4.G. 3 | Area and Perimeter: Students will apply perimeter and area formulas for rectangles. | DOK 1 | DOK 2 | DOK 3 |
| 4.G.3.a | Apply perimeter and area formulas for rectangles to solve authentic problems. | X | X | X |

|  | DATA: Students will solve problems and reason with <br> data/probability using multiple representations, make <br> connections within math and across disciplines, and <br> communicate their ideas. | DATA <br> 4.D |  |  |
| :--- | :--- | :--- | :--- | :---: |
| 4.D.1 | Data Collection: Students will formulate questions to <br> collect, organize, and represent data. | DOK 1 | DOK 2 | DOK 3 |
| 4.D.1.a | Generate and represent data using line plots where the <br> horizontal scale is marked off in appropriate units - whole <br> numbers, halves, fourths, or eighths. |  | x | x |
| 4.D.2 | Analyze Data and Interpret Results: Students will analyze <br> the data and interpret the results. | DOK 1 | DOK 2 | DOK 3 |
| 4.D.2.a | Solve authentic problems and analyze data involving <br> addition or subtraction of fractions presented in line plots. |  | x | x |
