## NSCAS - Math Table of Specifications

External/Paper
Grade 6

| 6.N | NUMBER: Students will solve problems and reason with <br> number concepts using multiple representations, make <br> connections within math and across disciplines, and <br> communicate their ideas. | NUMBER <br> 20-30\% |  |  |
| :--- | :--- | :---: | :---: | :---: |
| 6.N.1 | Numeric Relationships: Students will demonstrate, <br> represent, and show relationships among fractions, <br> decimals, percents, and integers within the base-ten <br> number system. | DOK 1 | DOK 2 | DOK 3 |
| 6.N.1.a | Determine common factors and common multiples. | x | x |  |
| 6.N.1.b | Determine prime factorization of numbers with and without <br> exponents. | x | x | x |
| 6.N.1.c | Model integers using drawings, words, number lines, models <br> and symbols. | x | x | x |
| 6.N.1.d | Determine absolute value of rational numbers. | x | x | x |
| 6.N.1.e | Compare and order numbers including non-negative <br> fractions and decimals, integers, and absolute values and <br> locate them on the number line. | x | x |  |
| 6.N.2 | Operations: Students will compute with fractions and <br> decimals accurately. | DOK 1 | DOK 2 | DOK 3 |
| 6.N.2.a | Divide multi-digit whole numbers and decimals using an <br> algorithm. | x | x | x |
| 6.N.2.b | Divide non-negative fractions and mixed numbers. | x | x | x |
| 6.N.2.c | Evaluate numerical expressions including absolute value <br> and/or positive exponents with respect to order of <br> operations. | x | x |  |

| 6.R | RATIOS AND PROPORTIONS: Students will understand ratio concepts and use ratio reasoning to solve problems. | RATIOS AND PROPORTIONS15-25\% |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 6.R. 1 | Ratios and Rates: Students will understand the concept of ratios and unit rates, use language to describe the relationship between two quantities, and use them to solve authentic situations. | DOK 1 | DOK 2 | DOK 3 |
| 6.R.1.a | Determine ratios from concrete models, drawings, and/or words. | Assessed at the local level |  |  |
| 6.R.1.b | Explain and determine unit rates. | Assessed at the local level |  |  |
| 6.R.1.c | Find a percent of a quantity as a rate per 100 and solve problems involving finding the whole, given a part and the percent. | x | x | x |
| 6.R.1.d | Convert among fractions, decimals, and percents using multiple representations. | x |  | x |
| 6.R.1.e | Solve authentic problems using ratios, unit rates, and percents. |  | x | x |
| 6.R.1.f | Use ratio reasoning to convert measurement units; manipulate and transform units appropriately when multiplying or dividing quantities. |  | x |  |
| 6.R. 2 | Represent: Students will represent ratios and rates on the coordinate plane. | DOK 1 | DOK 2 | DOK 3 |
| 6.R.2.a | Identify the ordered pair of a given point in the coordinate plane. | x | x |  |
| 6.R.2.b | Plot the location of an ordered pair in the coordinate plane. | Assessed at the local level |  |  |
| 6.R.2.c | Identify the location of a given point in the coordinate plane (e.g. axis, origin, quadrant). | x | x |  |
| 6.R.2.d | Make tables of equivalent ratios relating quantities with whole number measurements. |  | x |  |
| 6.R.2.e | Use the constant of proportionality to find the missing value in ratio tables. | x | x |  |
| 6.R.2.f | Plot the pair of values from a ratio table on the coordinate plane. |  | x |  |
| 6.R.2.g | Explain what a point ( $x, y$ ) on the graph of a proportional relationship means in terms of the situation. | x | x |  |

| 6.A | ALGEBRA: Students will solve problems and reason with algebra using multiple representations, make connections within math and across disciplines, and communicate their ideas. | $\begin{aligned} & \text { ALGEBRA } \\ & \text { 20-30\% } \end{aligned}$ |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 6.A. 1 | Algebraic Processes: Students will apply the operational properties when evaluating expressions and solving equations and inequalities. | DOK 1 | DOK 2 | DOK 3 |
| 6.A.1.a | Recognize and generate equivalent algebraic expressions involving the distributive property and combining like terms. | Assessed at the local level |  |  |
| 6.A.1.b | Given the value of the variable, evaluate algebraic expressions with non-negative rational numbers with respect to order of operations which may include absolute value. | x | X | X |
| 6.A.1.c | Use substitution to determine if a given value for a variable makes an equation or inequality true. | X | X |  |
| 6.A.1.d | Solve one-step equations with non-negative rational numbers using addition, subtraction, multiplication, and division. | x | x |  |
| 6.A.1.e | Solve one-step inequalities with whole numbers using addition, subtraction, multiplication, and division and represent solutions on a number line (e.g., graph $3 x>3$ ). | X | X |  |
| 6.A. 2 | Applications: Students will solve authentic problems with algebraic expressions, equations, and inequalities. | DOK 1 | DOK 2 | DOK 3 |
| 6.A.2.a | Create algebraic expressions (e.g., one operation, one variable as well as multiple operations, one variable) from word phrases. | X | X | X |
| 6.A.2.b | Write equations (e.g., one operation, one variable) to represent authentic situations involving non-negative rational numbers. | Assessed at the local level |  |  |
| 6.A.2.c | Write inequalities (e.g., one operation, one variable) to represent authentic situations involving whole numbers. | X | X | X |

| 6.G | GEOMETRY: Students will solve problems and reason with geometry using multiple representations, make connections within math and across disciplines, and communicate their ideas. | $\begin{aligned} & \text { GEOMETRY } \\ & \text { 10-20\% } \end{aligned}$ |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 6.G. 1 | Attributes: Students will identify and describe geometric attributes of two- dimensional shapes. | DOK 1 | DOK 2 | DOK 3 |
| 6.G.1.a | Identify and create nets to represent two-dimensional drawings of prisms and pyramids. | X | X | X |
| 6.G. 2 | Coordinate Geometry: Students will determine location, orientation, and relationships on the coordinate plane. | No additional indicator(s) at this level. |  |  |
| 6.G. 3 | Measurement: Students identify geometric attributes that create two- and three-dimensional shapes in order to perform measurements and apply formulas to find area and volume. | DOK 1 | DOK 2 | DOK 3 |
| 6.G.3.a | Determine the area of quadrilaterals and triangles, by composition and decomposition of these shapes, as well as applications of properties and formulas. Quadrilaterals include parallelograms and trapezoids. | x | x | X |
| 6.G.3.b | Determine the surface area of rectangular prisms and triangular prisms using nets as well as application of formulas. | X | X | X |
| 6.G.3.c | Apply volume formulas for triangular prisms. | X | X | X |

| 6.D | DATA: Students will solve problems and reason with data/probability using multiple representations, make connections within math and across disciplines, and communicate their ideas. | $\begin{gathered} \text { DATA } \\ \text { 10-20\% } \end{gathered}$ |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 6.D. 1 | Data Collection \& Statistical Methods: Students will formulate statistical investigative questions, collect data, and organize data. | No additional indicator(s) at this level. |  |  |
| 6.D. 2 | Analyze Data and Interpret Results: Students will represent and analyze the data and interpret the results. | DOK 1 | DOK 2 | DOK 3 |
| 6.D.2.a | Represent data using dot plots, box-and-whisker plots, and histograms. | Assessed at the local level |  |  |
| 6.D.2.b | Solve problems using information presented in dot plots, box-and-whisker plots, histograms, and circle graphs. |  | X | X |
| 6.D.2.c | Find and interpret the mean, median, mode, and range for a set of data. |  | X |  |
| 6.D.2.d | Compare the mean, median, mode, and range from two sets of data. |  | X | x |
| 6.D.2.e | Compare and interpret data sets based upon their measures of central tendency and graphical representations (e.g., center, spread, and shape). |  | x | x |
| 6.D. 3 | Probability: Students will interpret and apply concepts of probability. | DOK 1 | DOK 2 | DOK 3 |
| 6.D.3.a | Identify a list of possible outcomes for a simple event. | x |  |  |
| 6.D.3.b | Describe the theoretical and experimental probability of an event using a fraction, percentage, and decimal. |  | X | x |
| 6.D.3.c | Express the degree of likelihood (possible, impossible, certain, more likely, equally likely, or less likely) of simple events. | x | x |  |
| 6.D.3.d | Compare and contrast theoretical and experimental probabilities. | x | X | X |
