

Harvest of the Month

CUCUMBERS

PONIENTE

MARKETMORE

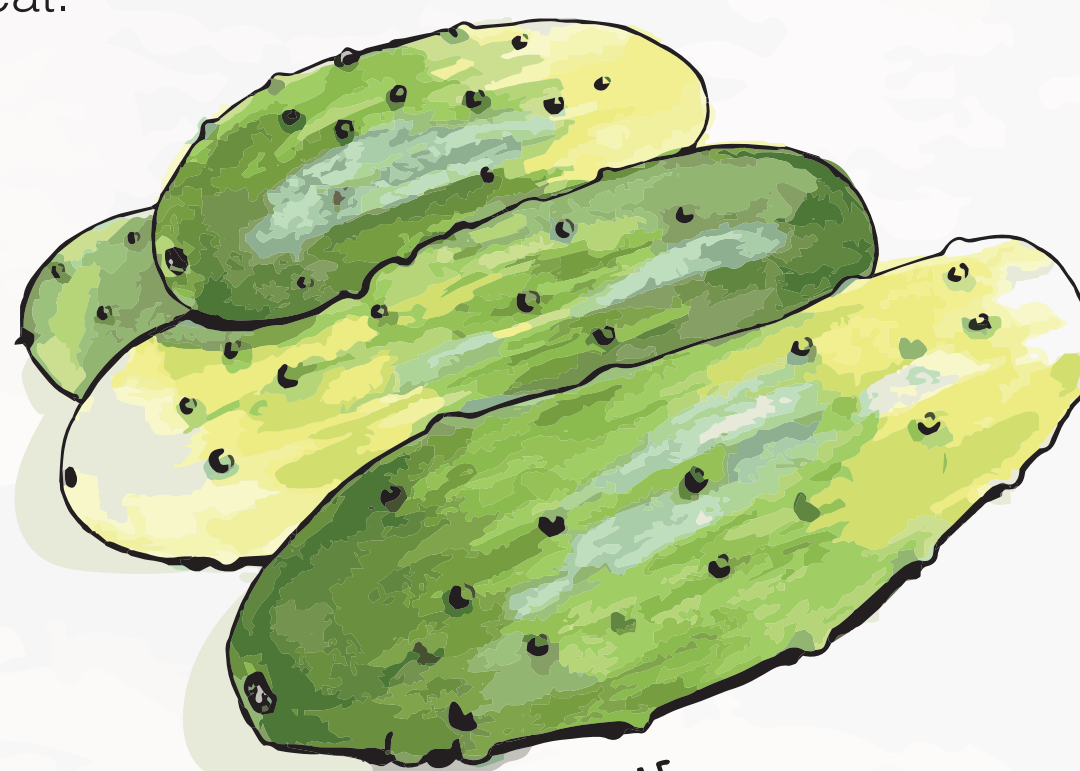

LEMON

DID YOU KNOW -

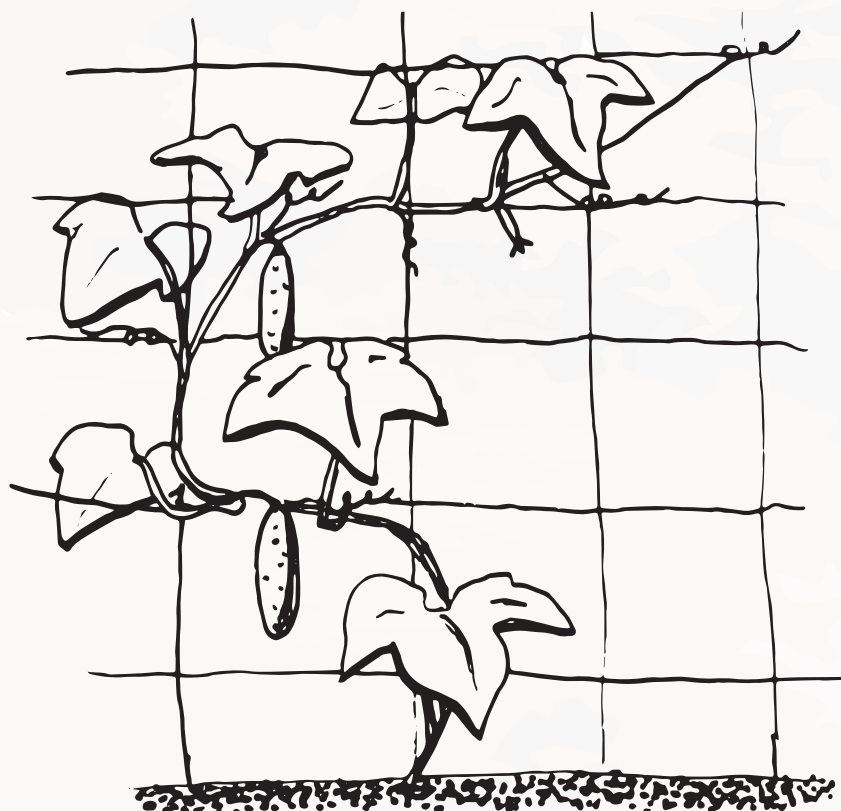

Cucumber flowers need to be pollinated by insects like honey bees, bumble bees, ants, sweat bees, flies, and wasps to turn into the cucumbers we eat.

MEXICAN SOUR GHERKIN

LITTLE LEAF

DID YOU KNOW -

Cucumbers grow on vines that reach 4-6 feet in length. The vines have tendrils, which look like curly ques, that help grab onto trellises so the plant can climb upward.
