NE 21st CCLC is transitioning to a new grant award structure. Beginning in 2025, awardees will receive an initial first-time grant. Those who meet specific qualifications may then apply for a renewability grant, which can extend their funding period – doubling the total duration and allowing for a maximum grant term of 10 years. Current grantees will be required to reapply through the competitive grant process when they reach the program year closest to a multiple of five (5). This approach will gradually transition all grantees into the new format over the next four years.
