## OVERVIEW

To help reduce missed class time, school calendars from all 21 ESU 13 school districts were compiled into one easy-to-access tool. Families, healthcare providers, and community agencies can use QR codes to quickly view district calendars and schedule appointments on days when school is not in session.

## HOW IT WORKS

Each district has its own QR code that links directly to an easy-to-read calendar page. Parents can scan the QR code for their child's district to view start times, early release days, and days off and plan appointments accordingly.

## IMPLEMENTATION

Laminated copies of the QR code page were delivered across the ESU 13 region to providers who schedule student appointments, including doctors, dentists/orthodontists, eye care, mental health, and healthcare clinics.
