

NEBRASKA CAREER READINESS STANDARDS

*Learning
Progressions
& Indicators*

Nebaska Career Readiness Standards are employability skills identified by Nebraska businesses and industry as the most essential skills sought after by employers in our state and nationwide. Career Development is intentional about teaching these skills through opportunities offered in PreK-12 with increasing complexity and relevance as students progress in career maturity.

The Learning Progressions & Indicators are based on the Nebraska Career Readiness Standards to provide educators with a framework of skill indicators for PreK-12. They are designed to inform educators throughout elementary, middle, and high school of the developmental nature of a student becoming career ready. The Learning Progressions & Indicators are to guide program-planning, curriculum, learning experiences, and activities for student achievement of the Nebraska Career Readiness Standards.

These skills also support students for transitions in life. They are transferable to any career, any workplace, and many other environments in the community. Every Nebraska student, regardless of background, interest, or intent after graduation need these skills.
